Lecture 6 – Marketing and SEO

How to Set Up
and Measure a
TikTok Influencer
Marketing Campaign

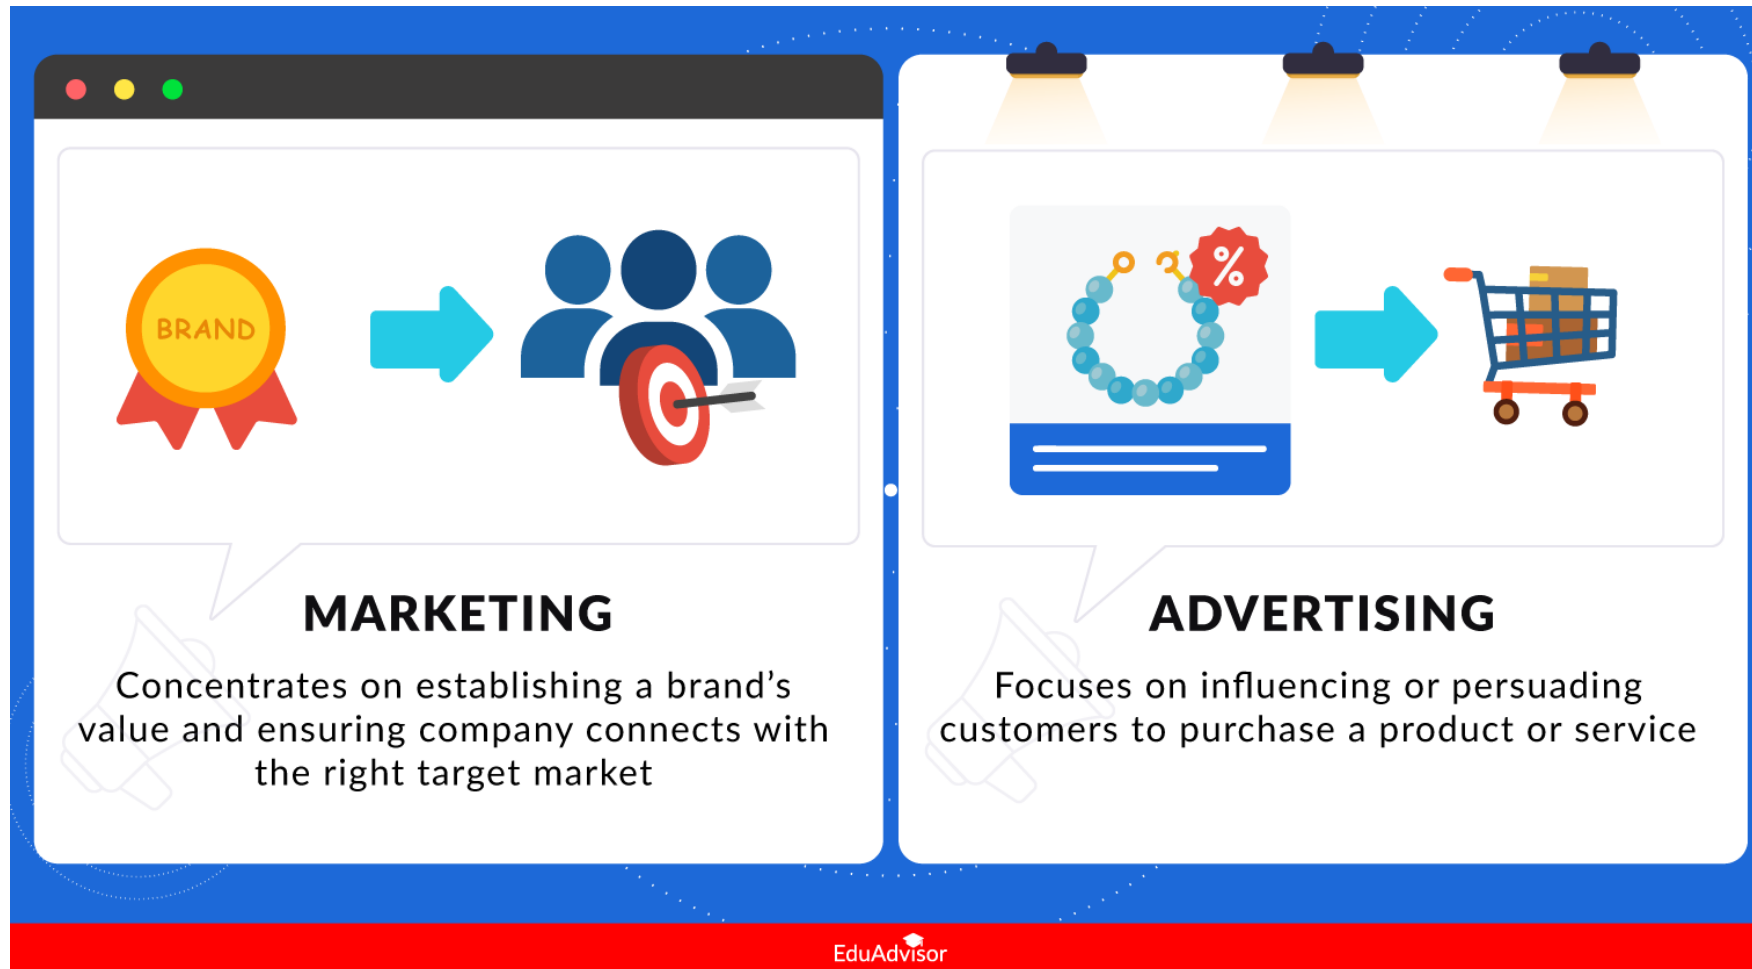

www.SocialMediaExaminer.com

Marketing Funnels

- **Awareness** – generate awareness and education to influence consideration amongst new audiences who may not be familiar with your brand. **End game** – impressions and reach.
- **Consideration** – enticing people to think about your brand over your competition. This middle funnel stage is considered the “deal-breaker”, where a customer is choosing between specific solutions and their alternatives. **End game** – clicks to website and click-through rates.
- **Conversion** – The ultimate goal you want consumers to take when they visit your content is to encourage a call to action. **End game** – total conversions, cost per conversion and return on investment.

Marketing vs. Advertisement

- Many time, people regards advertising as marketing, but it is **NOT**!

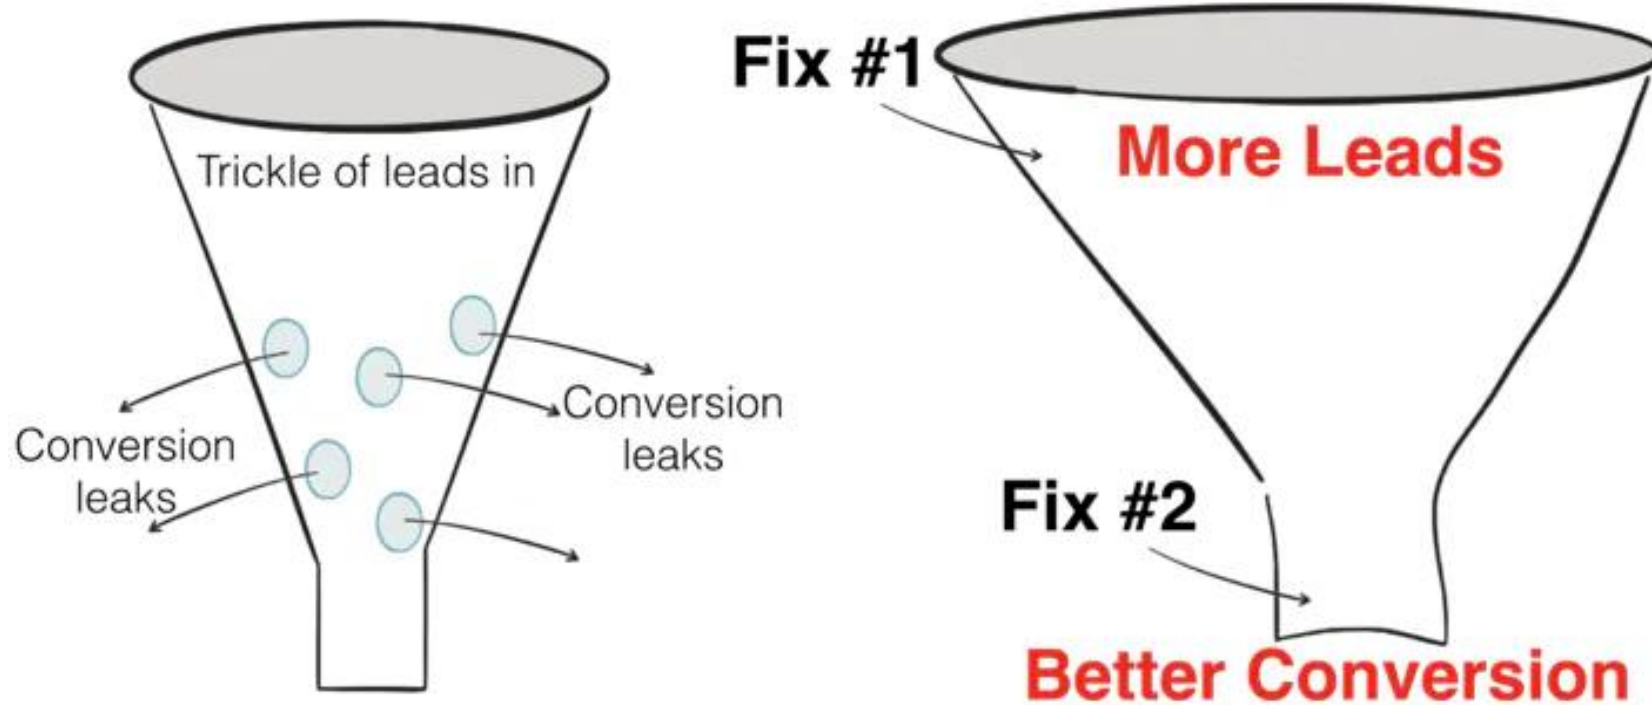

<https://eduadvisor.my/articles/marketing-vs-advertising>

Dingding did this advertisement @ Tencent

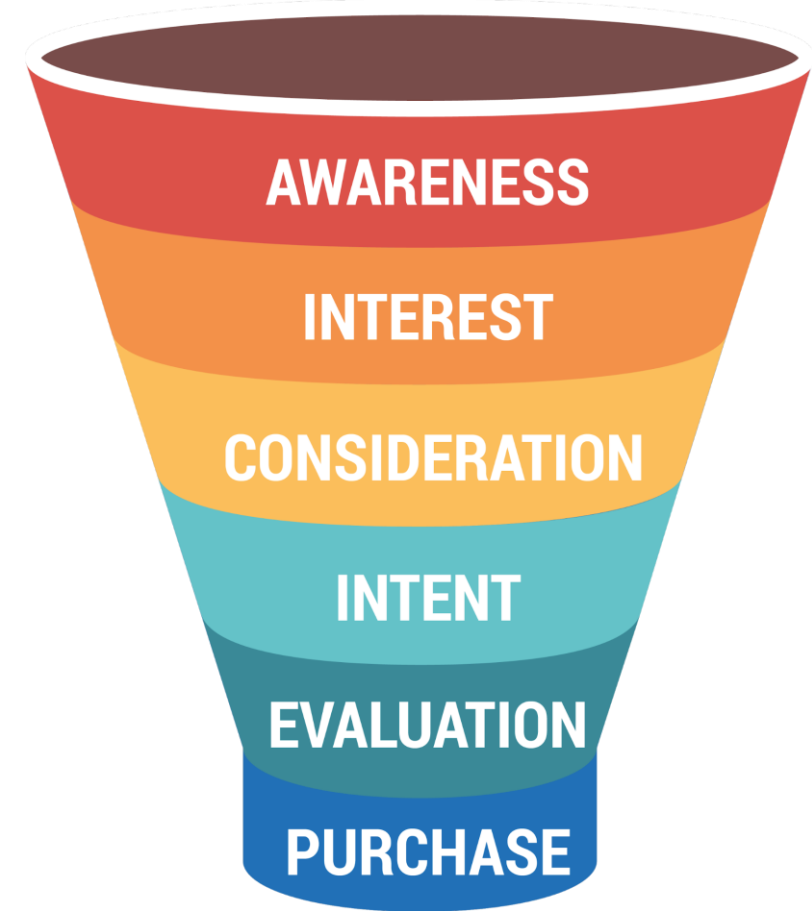

https://m.sohu.com/a/154799640_693172

Leaking is a waste

- Advertisement is an instant way to increase awareness
- If leads leak...

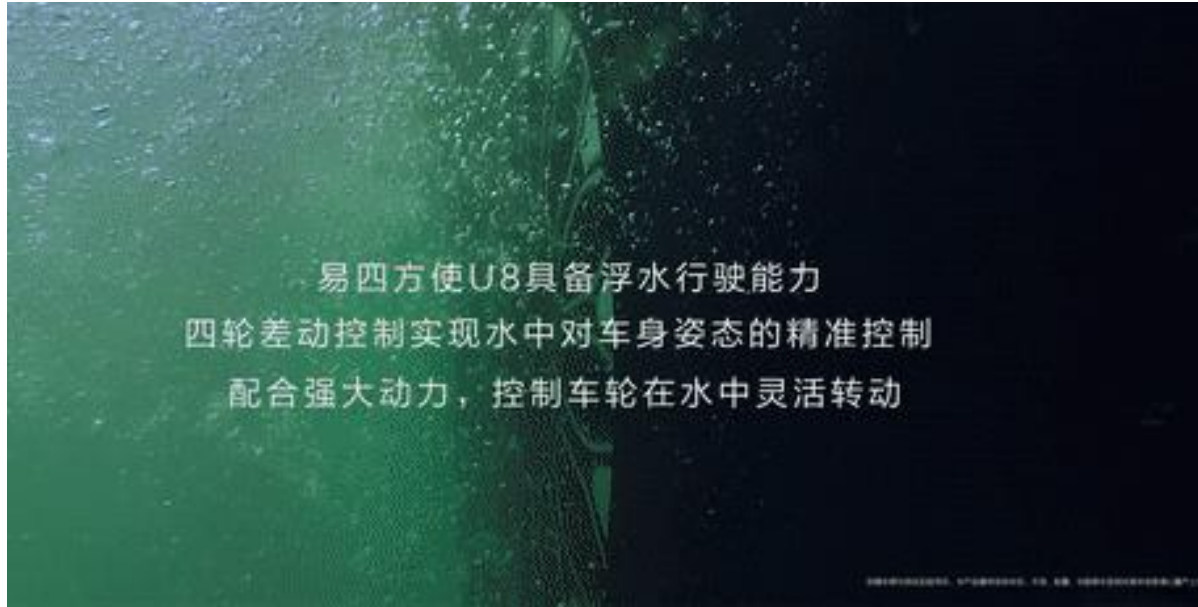

Marketing

<https://www.investopedia.com/terms/m/marketing.asp>

<https://www.business2community.com/marketing/the-ultimate-guide-to-marketing-funnels-02280375>

Product and Price

Product

Before they can prepare an appropriate campaign, marketers need to understand what product is being sold, how it stands out from its competitors, whether the product can also be paired with a secondary product, and whether there are **substitute products** in the market.

Price

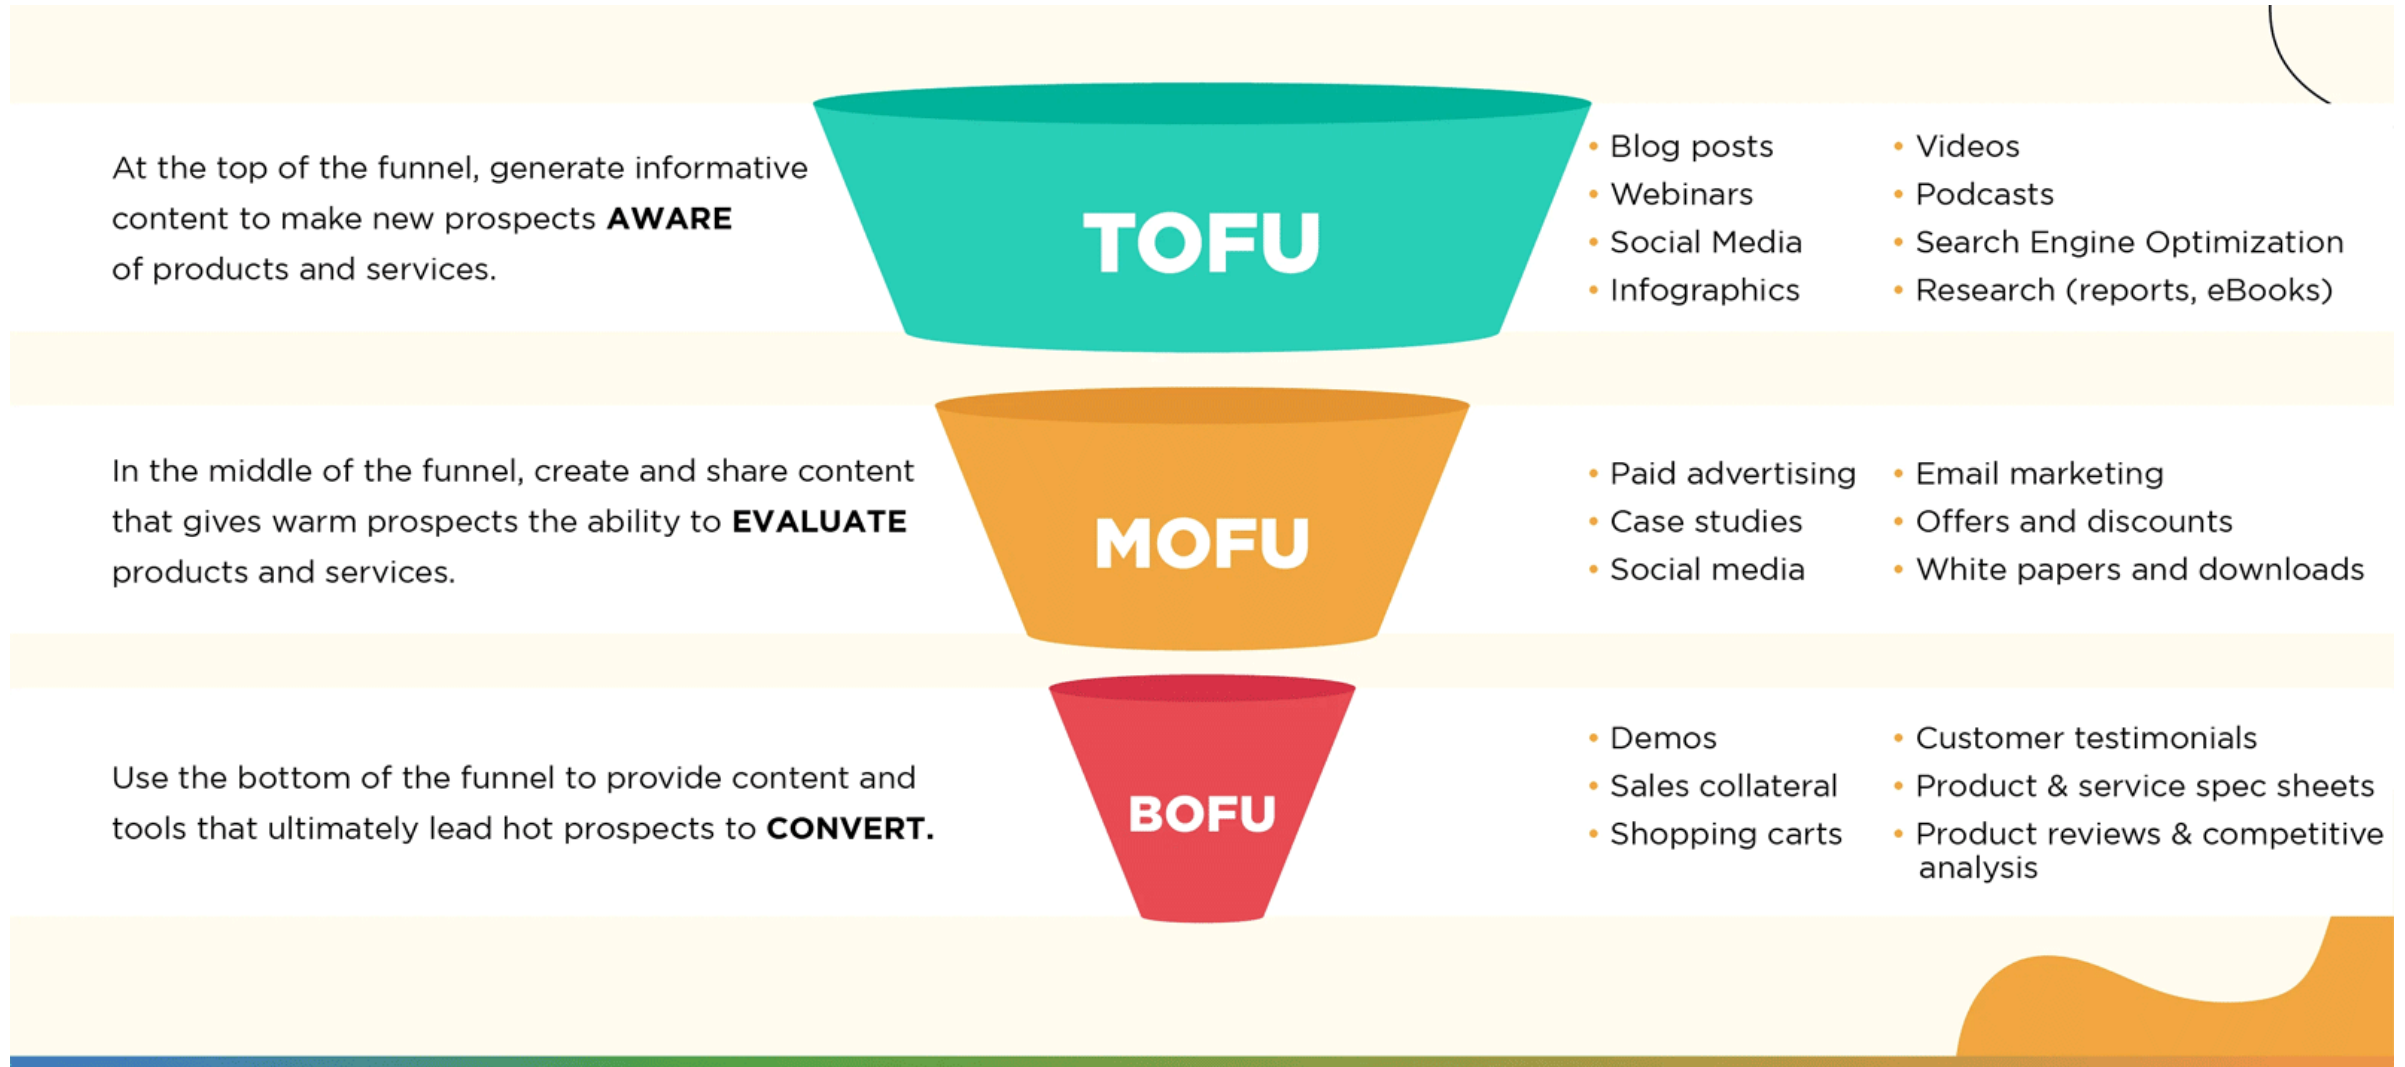

When establishing a price, companies must consider the unit cost price, marketing costs, and distribution expenses. Companies must also consider the price of competing products in the marketplace and whether their proposed price point is sufficient to represent a **reasonable alternative** for consumers.

Place

Place refers to the distribution of the product. Key considerations include whether the company will sell the product through a physical storefront, online, or through both distribution channels. When it's sold in a storefront, what kind of physical product placement does it get? When it's sold online, what kind of digital product placement does it get?

Promotion

Promotion It is the integrated marketing communications campaign. Promotion includes a variety of activities such as **advertising**, selling, sales promotions, public relations, direct marketing, sponsorship, and guerrilla marketing.

Traffic sources

- Search engine is an important source
- AI is the new traffic source

SEO and SEM

A screenshot of a search engine results page for the query "apple iphone 13". The page is divided into two main sections: "Paid" (top) and "Organic" (bottom). The "Paid" section contains two advertisements. The first is from AT&T, titled "The iPhone 13 is Almost Here - Pre-Order Now with AT&T®", with a URL of https://www.att.com/. The second is from Visible, titled "Get iPhone 13 Launch Updates - Coming Soon on Visible®", with a URL of https://www.visible.com/. The "Organic" section contains several search results. The top result is from Apple, titled "iPhone 13 Pro - Apple", with a URL of https://www.apple.com/iphone-13-pro/. Below it are other Apple links, including "iPhone 13 and iPhone 13 mini - Apple" and "Apple unveils iPhone 13 Pro and iPhone 13 Pro Max". At the bottom of the organic results is a "Top stories" section with three articles: "iPhone 13 Pro review: a better display, the best camera, and incredible battery life" from The Verge, "Apple iPhone 13 Review: The Most Incremental Upgrade Ever" from The New York Times, and "iPhone 13: Here's how to get the new phone for a fraction of the price before Friday" from CNET. On the right side of the page, there is a "Shopping" section titled "Apple iPhone 13" showing various carrier and retailer options, including T-Mobile, Apple, Best Buy, and AT&T, with their respective prices and shipping details.

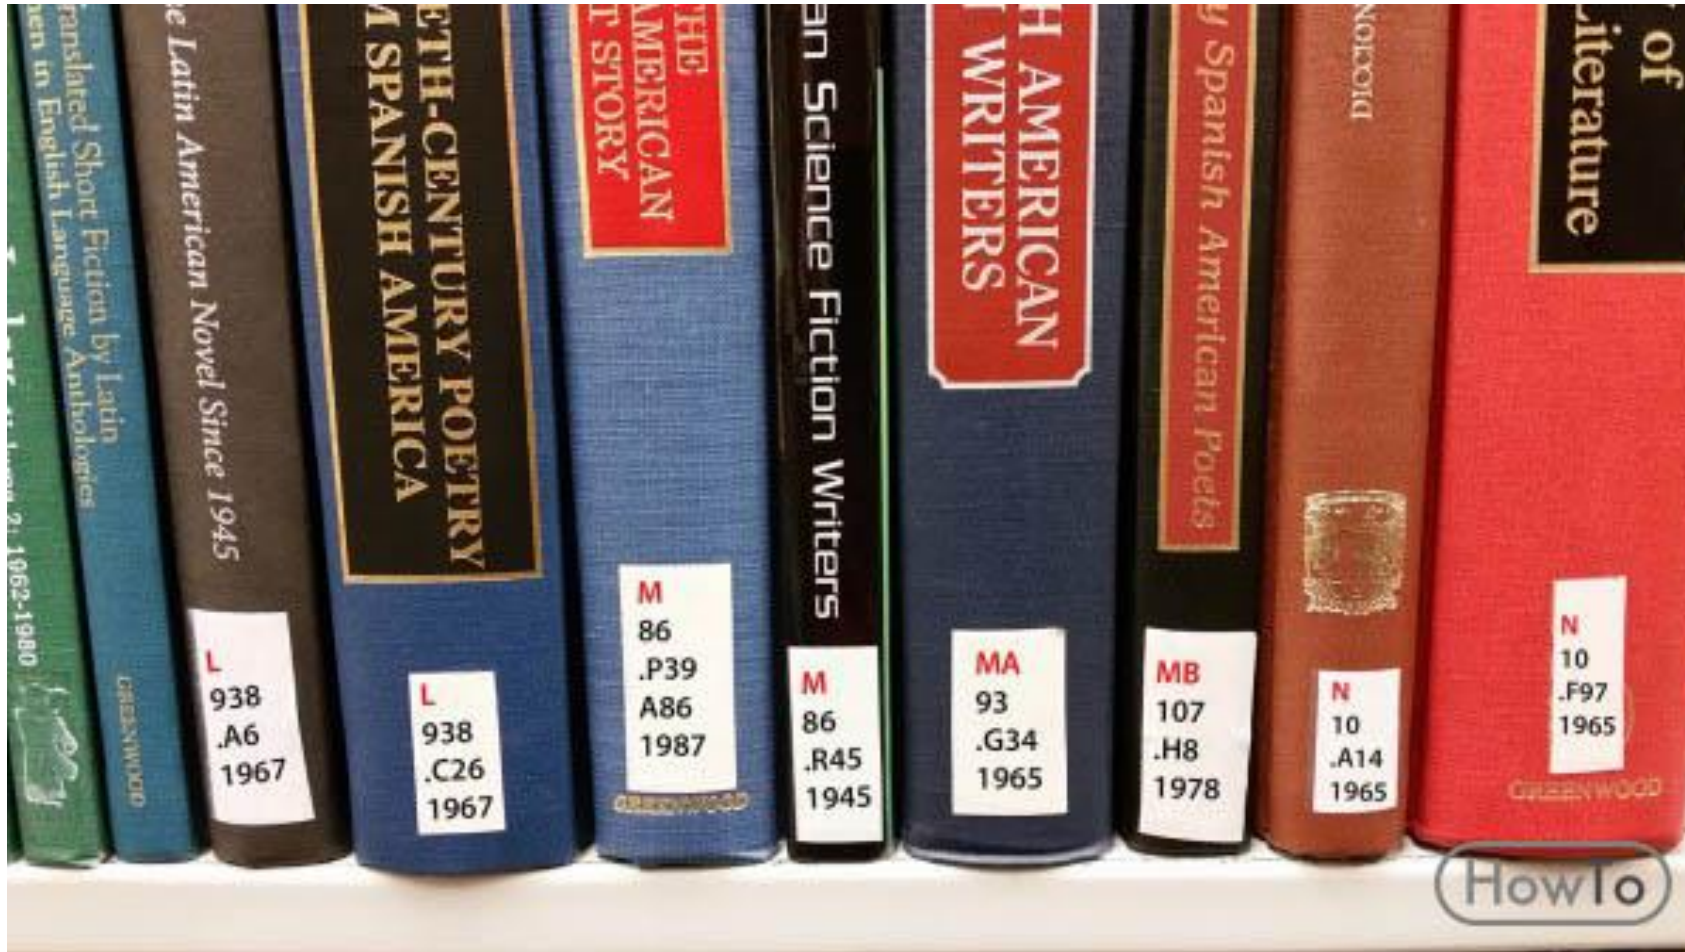

- **SEO stands for Search Engine Optimization.** This is part of your digital marketing strategy that focuses on driving traffic to your site organically.
- **SEM stands for Search Engine Marketing.** SEM refers to a set of digital marketing strategies that exist to drive traffic to your site. This is mainly accomplished through **optimizing paid ads**.

What's a search engine?

- A search engine is a software system that finds web pages that match a web search.

Find a book in library

- Books are classified to different categories.
- Choose the category, all books in such category would be shown.

Find a **RED** book in library

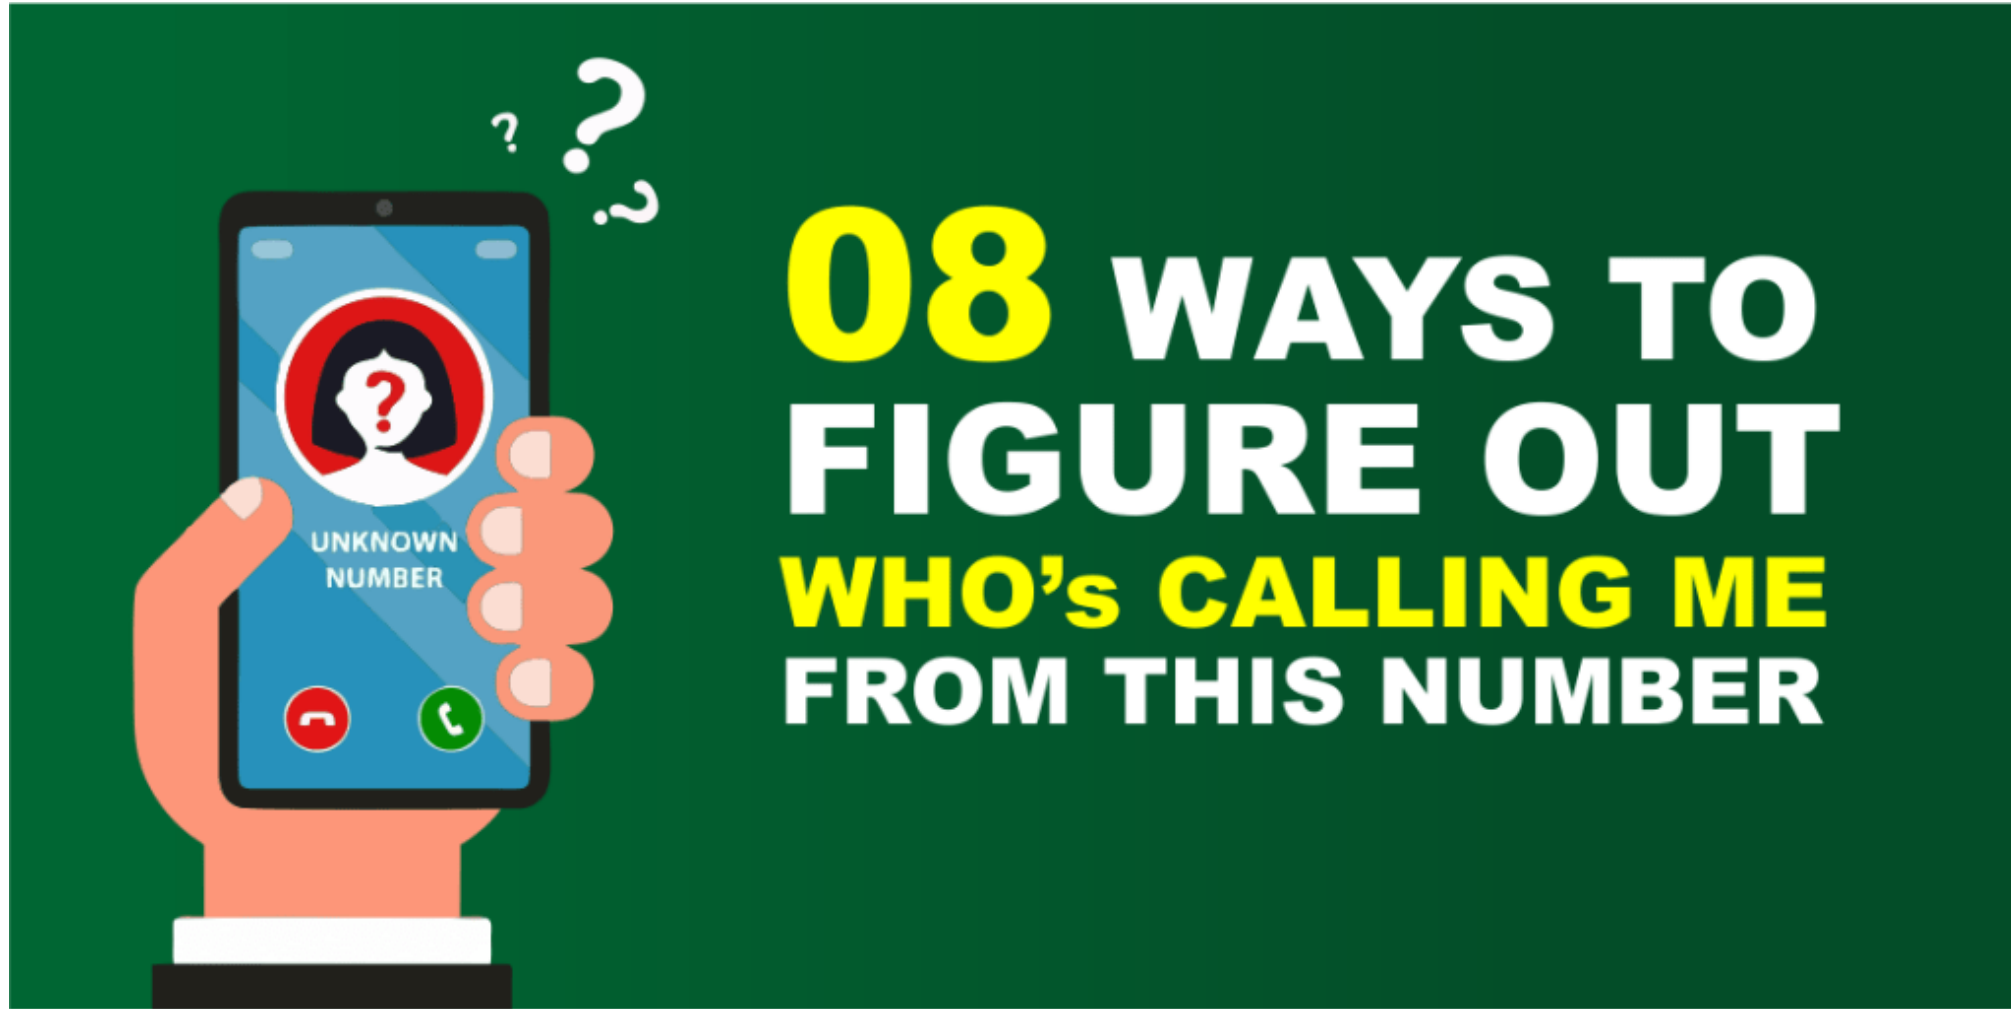

- It would be hard mission to find it through the library

Yellow page

- A dictionary to find telephone numbers.

From a number to its owner...

- Find a number in Yellow page ...

- **Contents vs. Index**
- Indexing is a systematic arrangement to present a concise list to readers so that they may find specific topics are terms presented in a book and makes them more accessible. The terms are sorted alphabetically listing names, places, things, and page numbers, which provides related terms a cross-reference and is an integral part of a book.

BackRub – rank the page

- Work on the BackRub search engine began in 1996.
- This project had set itself the goal of developing technologies which could create a universal digital library.
- It was a research project of **Larry Page**, who studied at Stanford University at the time and was part of the team that worked on the Stanford Digital Library Project (SDLP).
- Larry have tried to be sold it to Yahoo for \$1M **ONLY!**

SE (Search Engine) means ...

Crawling

Google bots search the web for fresh material by crawling new pages.

Indexing

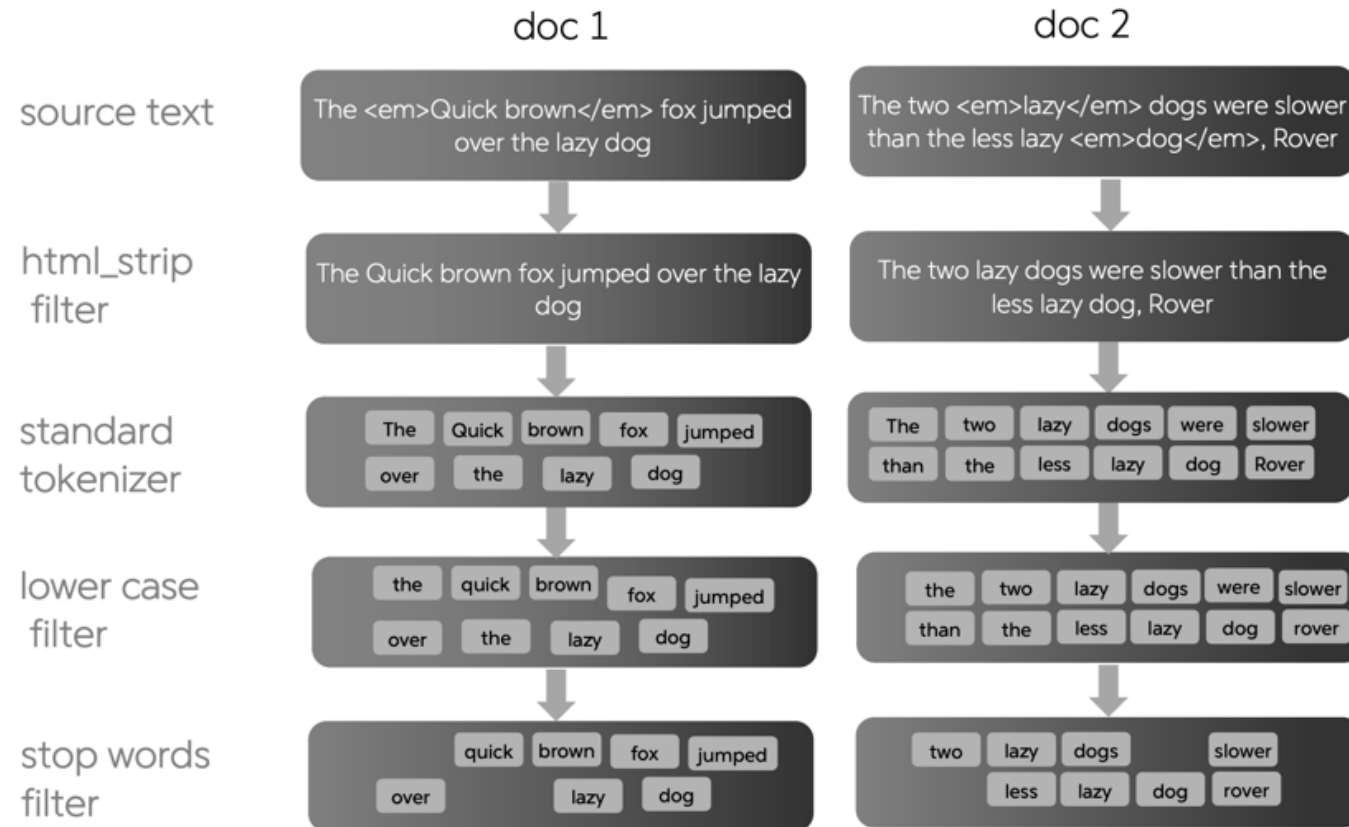

The Google Index is used to organise, categorise, and store the information that the bots have identified.

Ranking

Which pages appear in the SERPs and in what order are determined by the Google Ranking algorithm.

- 15,600,000 results, how to rank them?
- The quality of ranking determines the user experience.

Many algorithms for ranking

Search Engine Optimization

- Search engine generates a set of results with ranking for each search.
- This result set is named organic list.
- **Search Engine Optimization or SEO** is the act of modifying a website to increase its ranking in *organic (vs paid)*, crawler-based listings of search engines.
- The higher rank can bring you more web traffic.

Tips for SEO - Keywords

The main purpose of performing keyword research is to find words or phrases that your potential clients or customers are searching for on Search Engine, some tips:

- Determine the search volume and competitiveness level for each keyword.
- Include long-tail keywords organically in the blog.
- Understand the Customer's Purpose, like informational, navigational, and transactional needs of customers, to find the best ones.
- Find your competitors' keyword planning techniques, analyze them, and use the best ones based on their results. Tools like **SEMrush** or **SpyFu** can help you find effective keywords that are more helpful for ranking up.
- Sort your selected keywords into suitable groups or themes.
- Make sure to monitor your content and keywords continuously. You can use tools like Google Analytics and Search Console to monitor the performance of your content and keywords. Based on the analysis, you can make improvements to improve the SEO rankings further.

Tips for SEO - Contents

Content is always **king** for the the ranking. Without quality content, you can't even think about ranking a website. Google's Panda and Penguin notified that content could primarily affect your SEO strategy. Some tips:

- Make sure to add all the relevant keywords in the content naturally.
- Use high-quality images, infographics, videos, and animations to increase your content's visual appeal and boost user interactions.
- The content of your pages should be related to the keyword you are trying to rank for!
- Maintain the required keyword density to boost rankings,
- Create eye-catching headings and sub-headings to reduce bounce rate.
- Use short paragraphs, short sentences, bullet points, subheadings, and white space to increase readability and drive desired results.
- Include relevant internal links to other pages on your website and external links to boost the credibility of your content.
- Ensure your content is flexible so it can be adjusted in every screen size.

Tips for SEO – Keep website fresh

You don't want your users to click your content, but it probably bounces because your website has outdated content. Timely refreshing and updating the content is crucial.

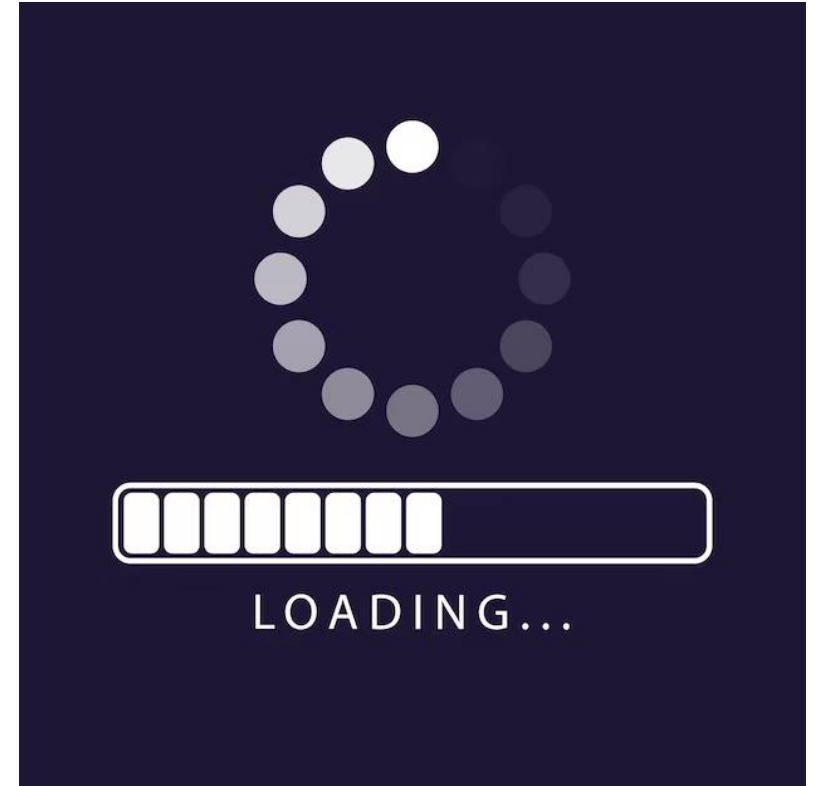

Some tips:

- Update your website's statistics and data with the latest information.
- Present fresh ideas, expands, or trends related to the topic.
- Find new keywords that have gained popularity recently related to the topic.
- Add new images, graphics videos, or other multimedia elements to enhance visual impact.
- Showcase the updated date, time, and day when you have updated the content to show the relevancy of the content.

Tips for SEO – Instant Loading

The slow speed of your website will also have a more significant impact on your rankings and on user experience. Some tips:

- Make sure to optimize your image to boost your website speed.
- Compress JavaScript and CSS files to increase the speed.
- Delete unnecessary render-blocking Scripts.
- Implement lazy loading / dynamic loading.
- Upgrade the performance of servers to ensure rapid response times.
- Optimize your website fonts and content.
- Make sure that your website is mobile-responsive and that it adapts quickly to multiple screen sizes and gadgets.

Tips for SEO – Accessibility for all users

Website accessibility fundamentally implies that the website should be primed to offer an enjoyable and engaging experience to all users, irrespective of whatever disability or limitation they might have. Some tips:

- Use header tags in your text to help visually impaired users understand when they reach important points.
- Make use of colors with strong contrast to make it easier for readers to differentiate text from background.
- Use a font size that is easily readable on different screens and devices.
- Make your website's keyboard accessible.
- Use photos with illustrative Alt text for improved accessibility.
- Add a transcript or enable captions for videos and even content.

Tips for SEO – Optimize URLs

Keeping URLs as transparently visible, pertinent, attractive, and updated as possible is vital to make it convenient for your users and search engines. Some tips:

- Make the URL focused on the page's fundamental topic.
- Use short URLs that represent the website's concept.
- Design human-readable URLs that can give users an overview of website content.
- Add appropriate keywords in the URL that are related to the content.
- To separate the keywords in the URL, use hyphens (-).
- Avoid the use of underscore (_) or space because they can create issues in readability.
- Compose your URLs properly by categorizing content with folders.

Tips for SEO – Mobile first

The use of mobile phones and tablets has over pressed the PC in today's generation. Some tips:

- Your website design should be responsive to adapt to any screen size.
- Use fonts that are properly visible and easy to read on mobile screens.
- Optimize **loading speed**.
- Make your content easy to read and navigate on small displays.
- Use images with accurate sizes and can load instantly on all devices.
- Maintain enough space around buttons and links to avoid mistaken clicks.
- Make your meta titles and descriptions as brief and exciting as possible.

Tips for SEO – Properly Structure the Content

A well-structured website not only improves user experience but also makes it easier for search engines to crawl and index your site. Some tips:

- Find the appropriate phrases and keywords your target audience may use to find your content.
- Use header tags (H1, H2, H3...) to create an organized structure for your content.
- Create easy navigation URLs.
- Write unique, valuable, and informative content with proper heading and sub-headings that answers your target audience's requirements and queries.
- Use essential keywords where necessary to make it easily accessible.
- Add internal links on your website so that search engines can recognize your website content easily.

Tips for SEO – Social Media

The resulting social signals, like likes, shares, and comments, can also indirectly enhance your SEO. Some tips:

- Match keyword research with posting concepts.
- When a customer visits a social media profile, ensure that they get all the needed information about the company.
- Include all the sharing icons on your website and even blogs.
- Whenever content appears on your customer's timeline, make sure they can share on social media in just one click.
- Generate high-quality content to publish on social media platforms.

Tips for SEO – Internal Linking

Internal links also help search engines easily and quickly find, search, and understand all of the pages on the website. Some tips:

- When creating internal links, use informative and appropriate anchor text.
- Use all the relevant internal links to the content.
- Do keyword research to figure out the most important and best keywords for all the pages of your website.
- Important pages should be easy to find and should be linked from the top navigation menu or footer.
- Your website should be deep linking, which means links are not only mentioned on the homepage but also on internal pages.
- Check your website for broken or outdated links regularly.
- Use breadcrumb navigation.
- Determine your website's most important pages and prioritize linking to them more regularly.

Tips for SEO – Optimize the Images

Optimized images require less storage space on the system, enabling the website to load rapidly while offering an interactive customer experience. Some tips:

- Avoid using large images. Reduce your image sizes without sacrificing quality.
- Use a suitable format for images like JPEG, PNG, and WebP.
- Apply relevant alt text for images.
- Provide captions and titles to provide additional information and keywords.
- Images should be responsive and should appear appropriate on various screen sizes.
- Add a few relevant images, but don't add too many images.

Tips for SEO – High-Quality Backlinks

Backlinks are your website links that are listed on another website, it works like an reference letter. Some tips:

- To attract high-quality backlinks, focus on creating engaging and valuable content that other websites will find worthy of linking to. It includes blog posts, articles, infographics, videos, or any other type of material that provides value to your target audience.
- Start publishing press releases through reputable distribution companies for important announcements, events, or successes linked to your business.

Subject: Resumé of Chris Li

Gentlemen,

Please find the attached resume of my son, Chris Li. He is applying the following colleges for this year:

1. Brown University;
2. Cornell University;
3. New York University.

Please can you provide some advice for his applications.

Many thanks and happy new year.

Jonathan

Subject: Christopher Li Recommendation Letter

Jonathan-

Hunter asked me to send you a copy of the recommendation letter that he asked his father to write on behalf of Christopher for Brown University. The original is being FedExed to Dr. Paxson directly at Brown. It should be there by Tuesday at the latest (given Monday is a holiday here in the U.S.).

Let us know if you have any questions.

Best,

Eric

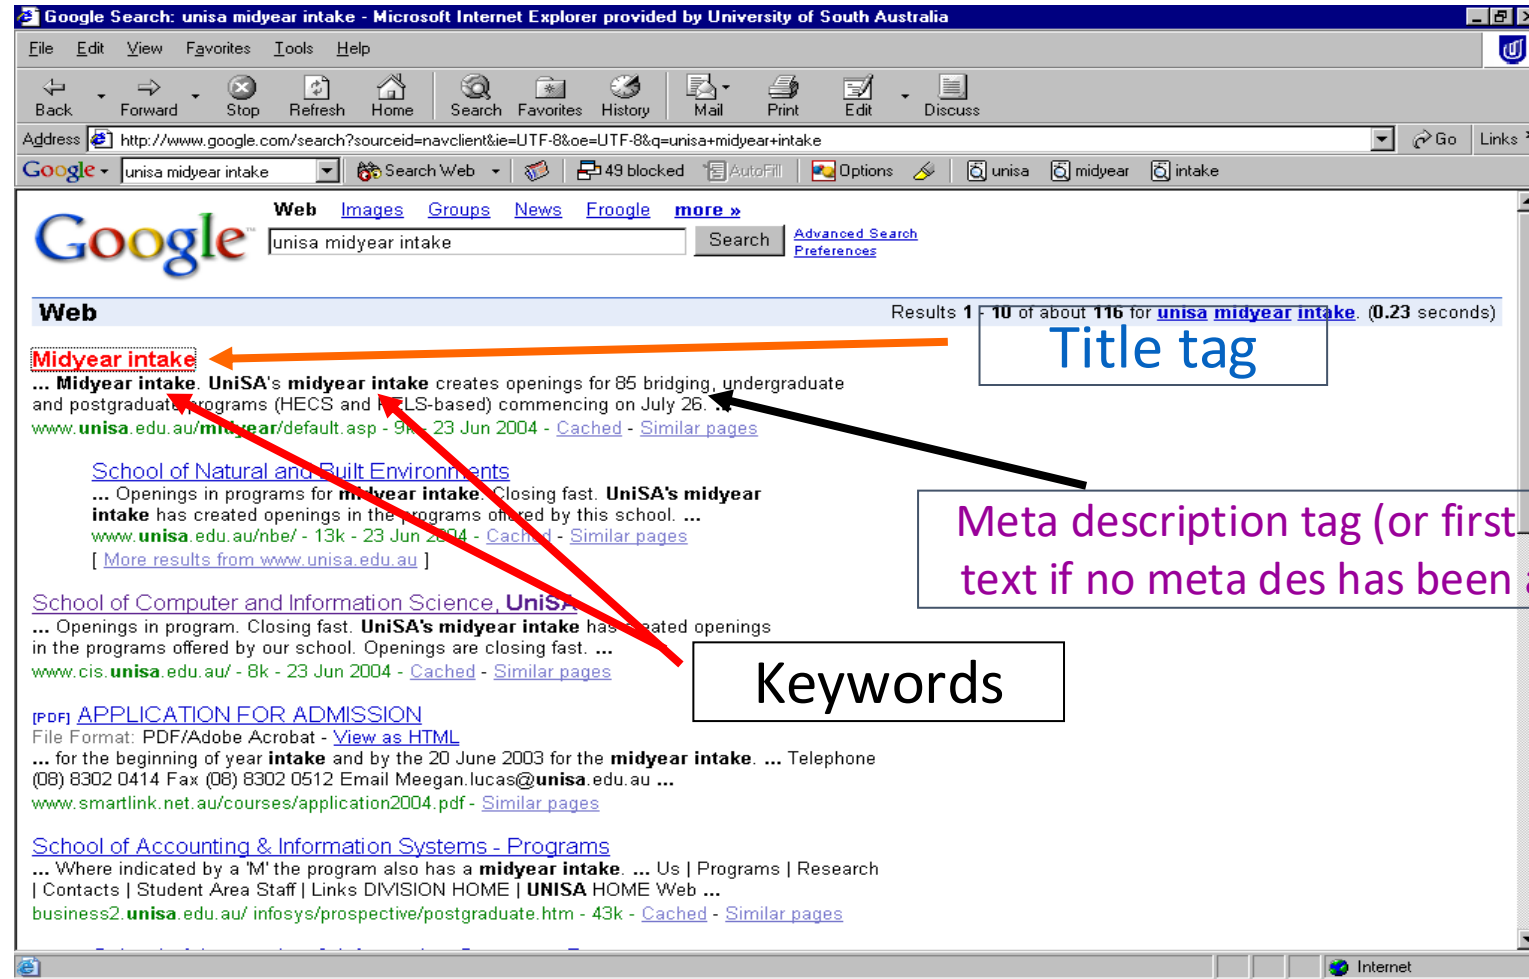

Tips for SEO – Location based results

Some information are very related to the location, for example: restaurants. Some tips:

- Implement location-specific pages for your website.
- Get high-quality backlinks from local websites, blogs, and directories.
- Keep an active presence on social media channels and engage with local customers.
- Include location-specific information throughout your website, including titles, headings, and content.
- Apply schema markup on your website to help search engines learn about your company's location, contact information, and other relevant details.
- Add Guest posts on local blogs or websites.

Tips for SEO – Title Tags and Meta Descriptions

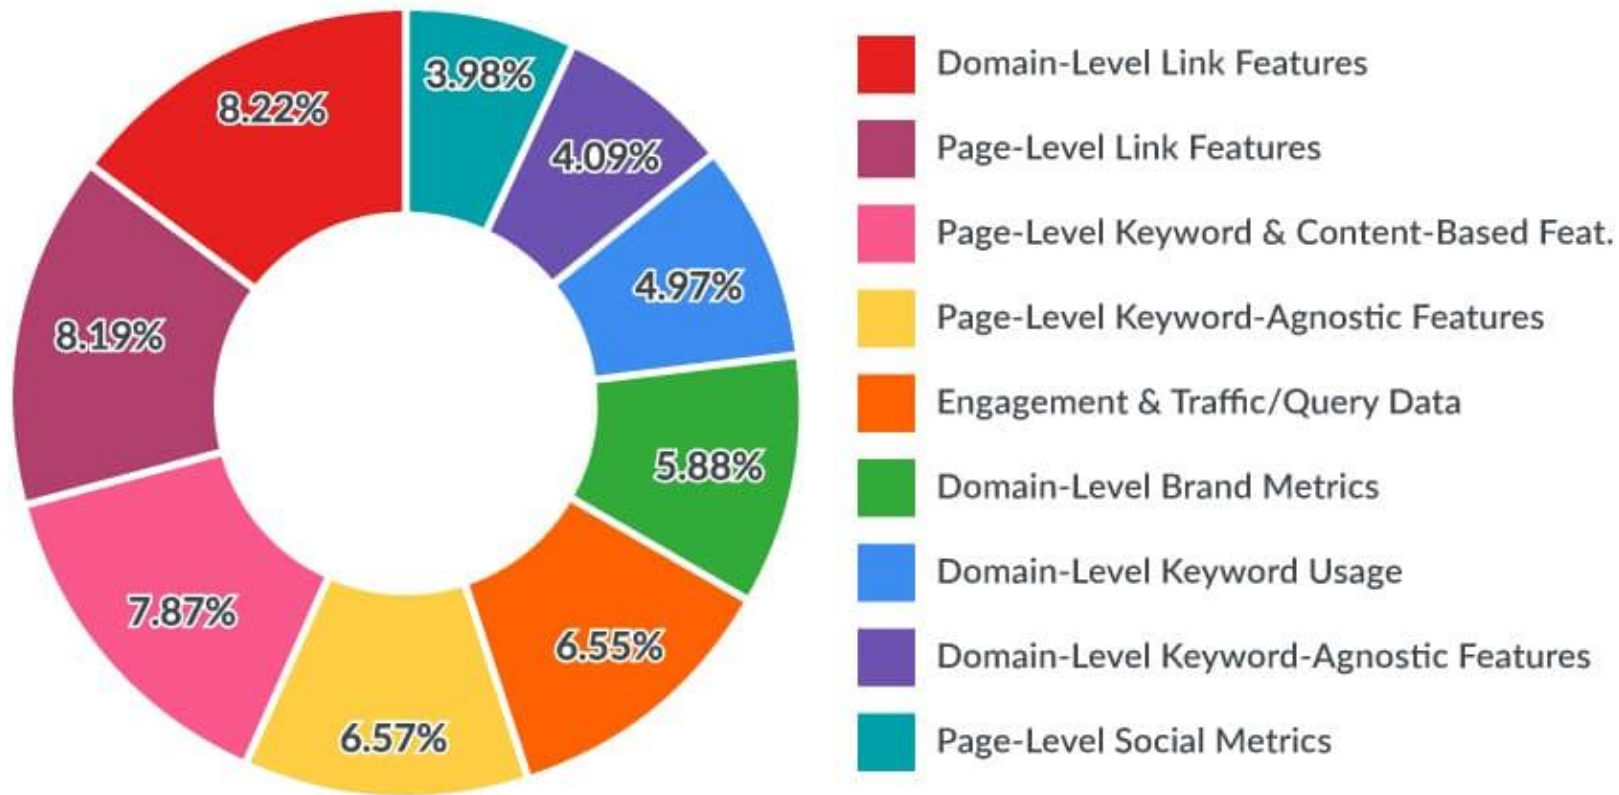

Tips for SEO – Title Tags and Meta Descriptions

Meta title and description help Google and users to understand the content of a specific webpage. Writing the useful meta title and meta descriptions can dramatically boost click-through rates from SERPs. It will help you to drive more traffic from Google and generate more sales. Some tips:

- Your website's Title Tags and Meta Descriptions should be attractive and unique as compared to other websites in your industry.
- Title Tags' length should be 50 to 60 characters, and meta description's length should be around 160 characters.
- Title Tags and Meta Descriptions should match search intent.
- Add targeted keywords in the Title Tags and Meta Descriptions.

SEO - Multi-factors driving

The Influence of Ranking Factors in Google's Algorithm
Based on a survey of over 150 SEO experts

- There are more than 200 factors ...

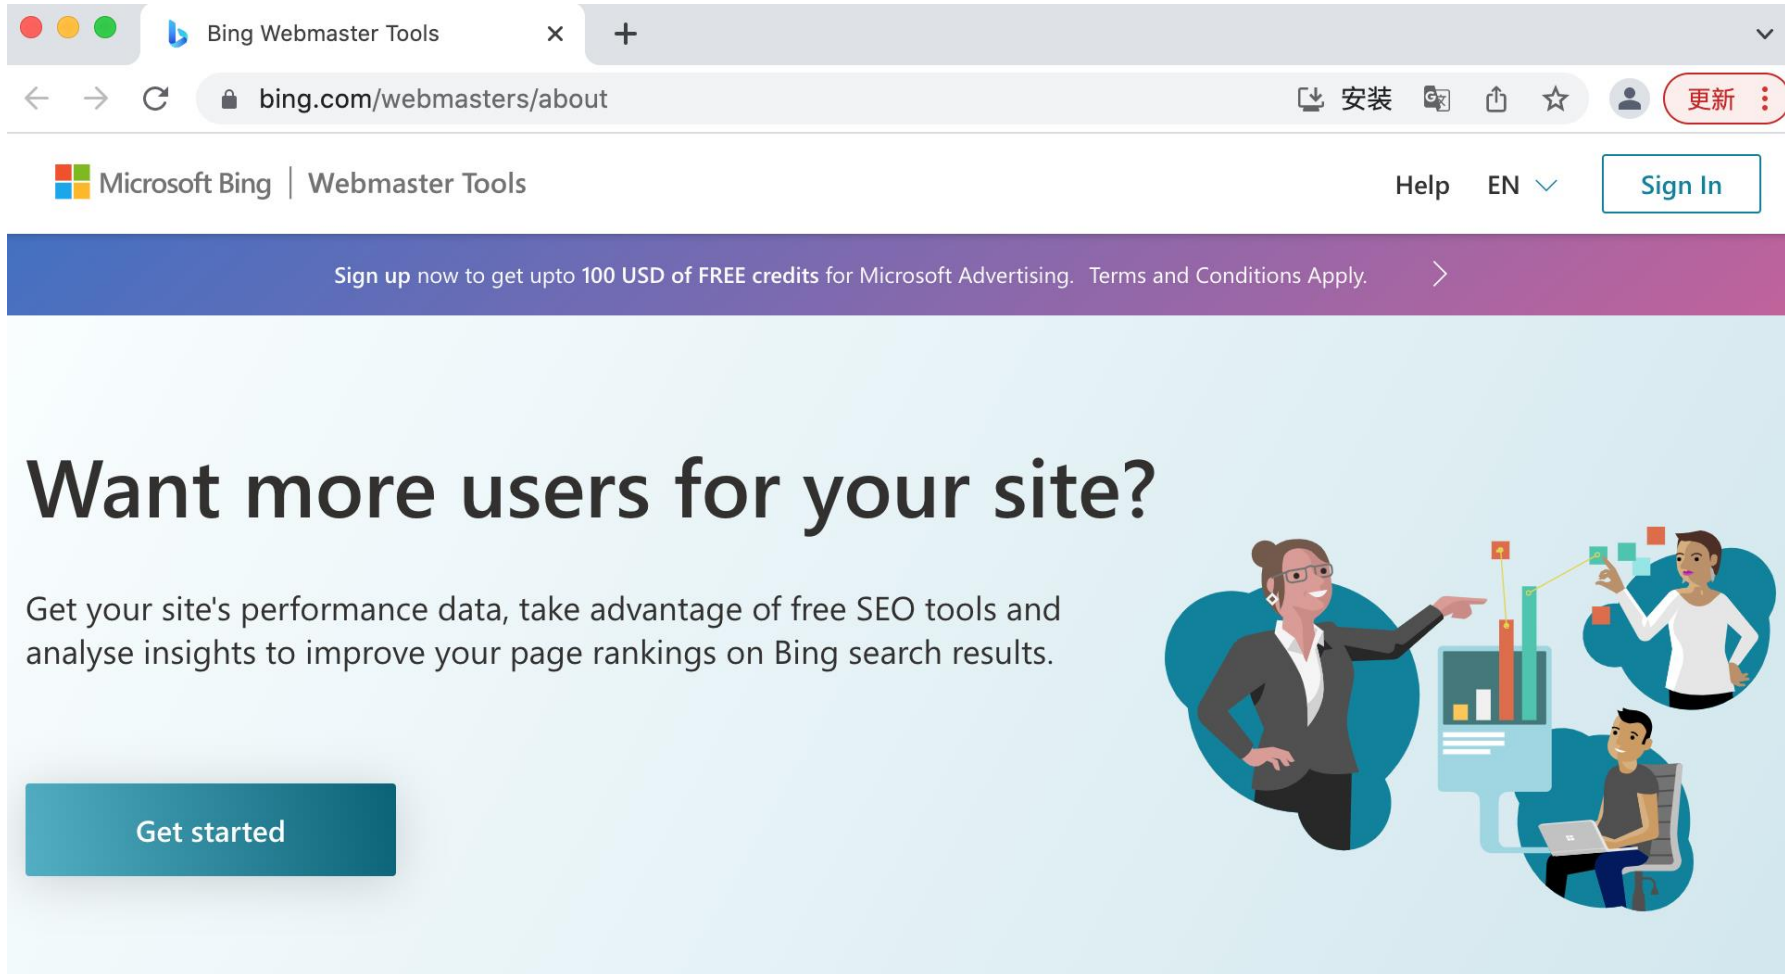

SEO - what is NOT recommended

- **Flash and shockwave** (actually not used in HTML5)- spiders do not pick up these files
- **Image only sites** - spiders do not pick up images
- **Image site maps** - spiders cannot read image maps

Do not use them on your home page or critical pages

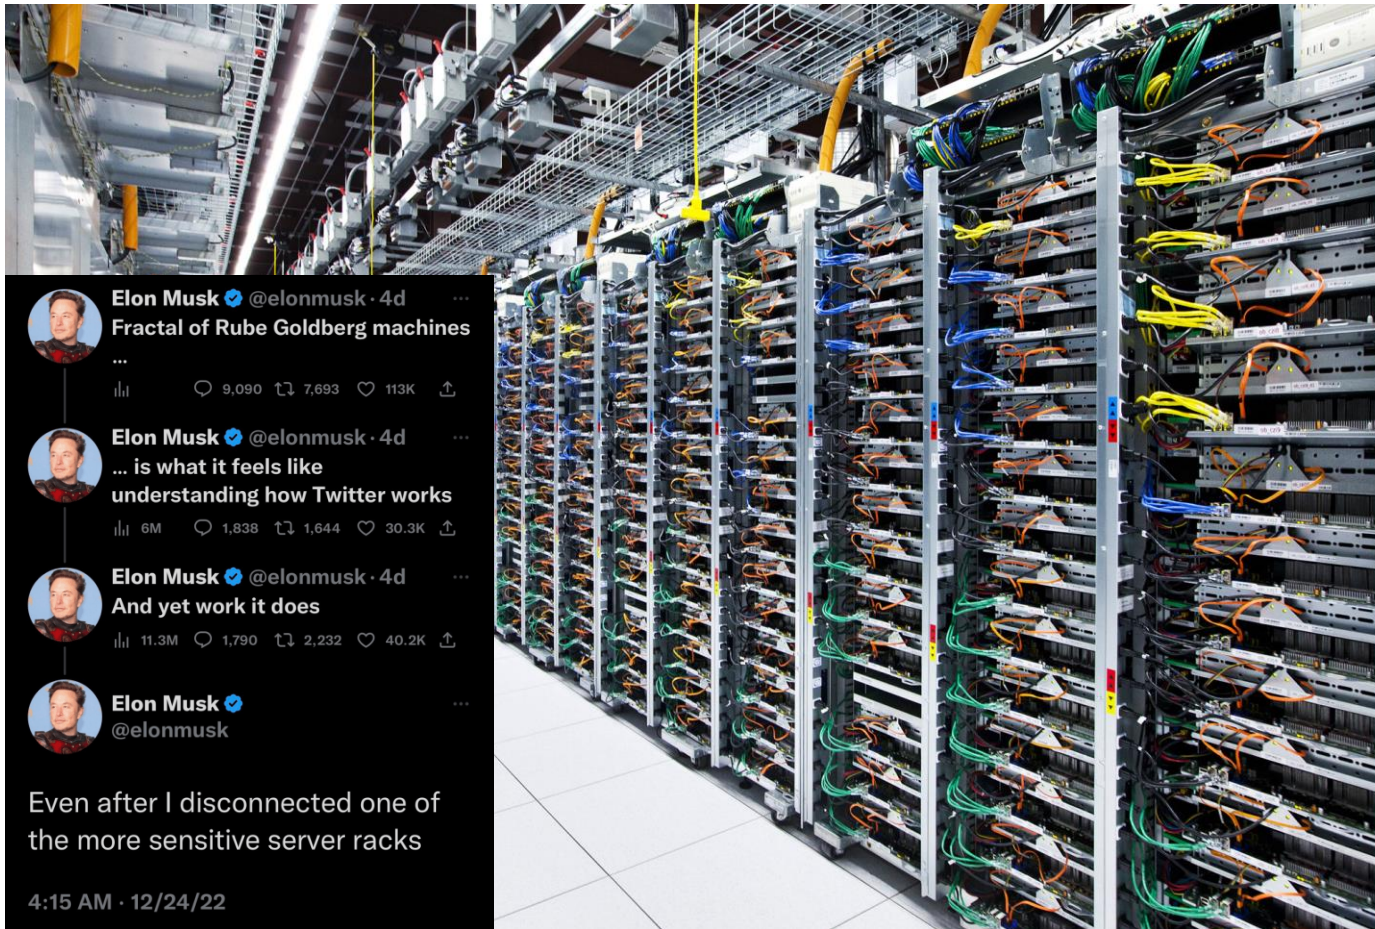

- **Frames** - only one page can be titled (titling is critical in search rankings)
 - If the spider cannot read the complete page (because of the frames), it will not be indexed properly.
 - Some spiders may not even read a frames web site
- **Misspellings, JavaScript or HTML errors** (validate your code)

New site – Not listed by the search engine?

- For a new web, you can submit it to SEs

Each visit means money

How does Google make money?

Offline, bustling crowds pass by your place of business. Some of the passerby traffic notices you and walks in.

"Location, Location, Location"

Online, people **search** for information. Millions of people. Each searches alone.

"Information, information, information"

• **Traffic** → **money**

Google adv.

The screenshot shows a Google search for "sap on cloud computing". The search bar is at the top with the Google logo. Below the search bar, there are tabs for "Web", "Images", "Maps", "Shopping", "Videos", "More", and "Search tools". The search results show "About 27,800,000 results (0.22 seconds)".

Pay Per Click Advertisements

SEM

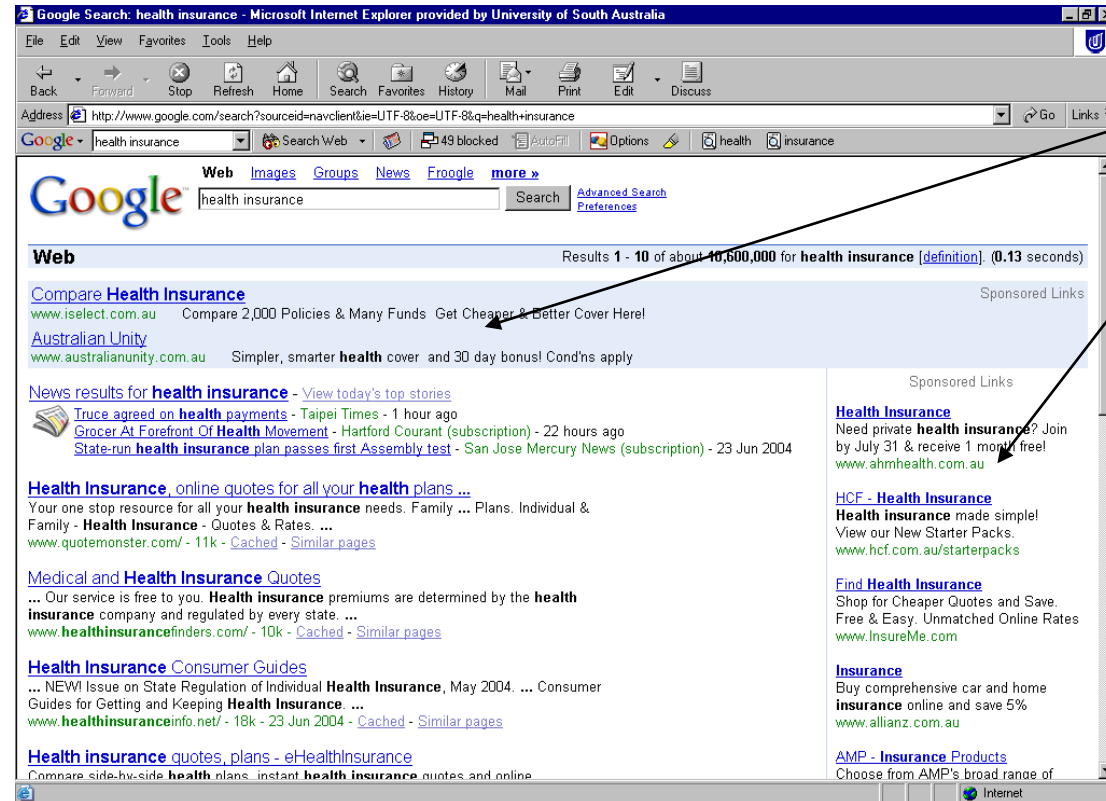

What is search engine marketing (**SEM**)?

SEM is the act of marketing a website via search engines by purchasing paid listings

What are paid listings?

These are listings that search engines sell to advertisers, usually through *paid placement* or *paid inclusion* programs.

In contrast, organic listings are not sold.

SEM

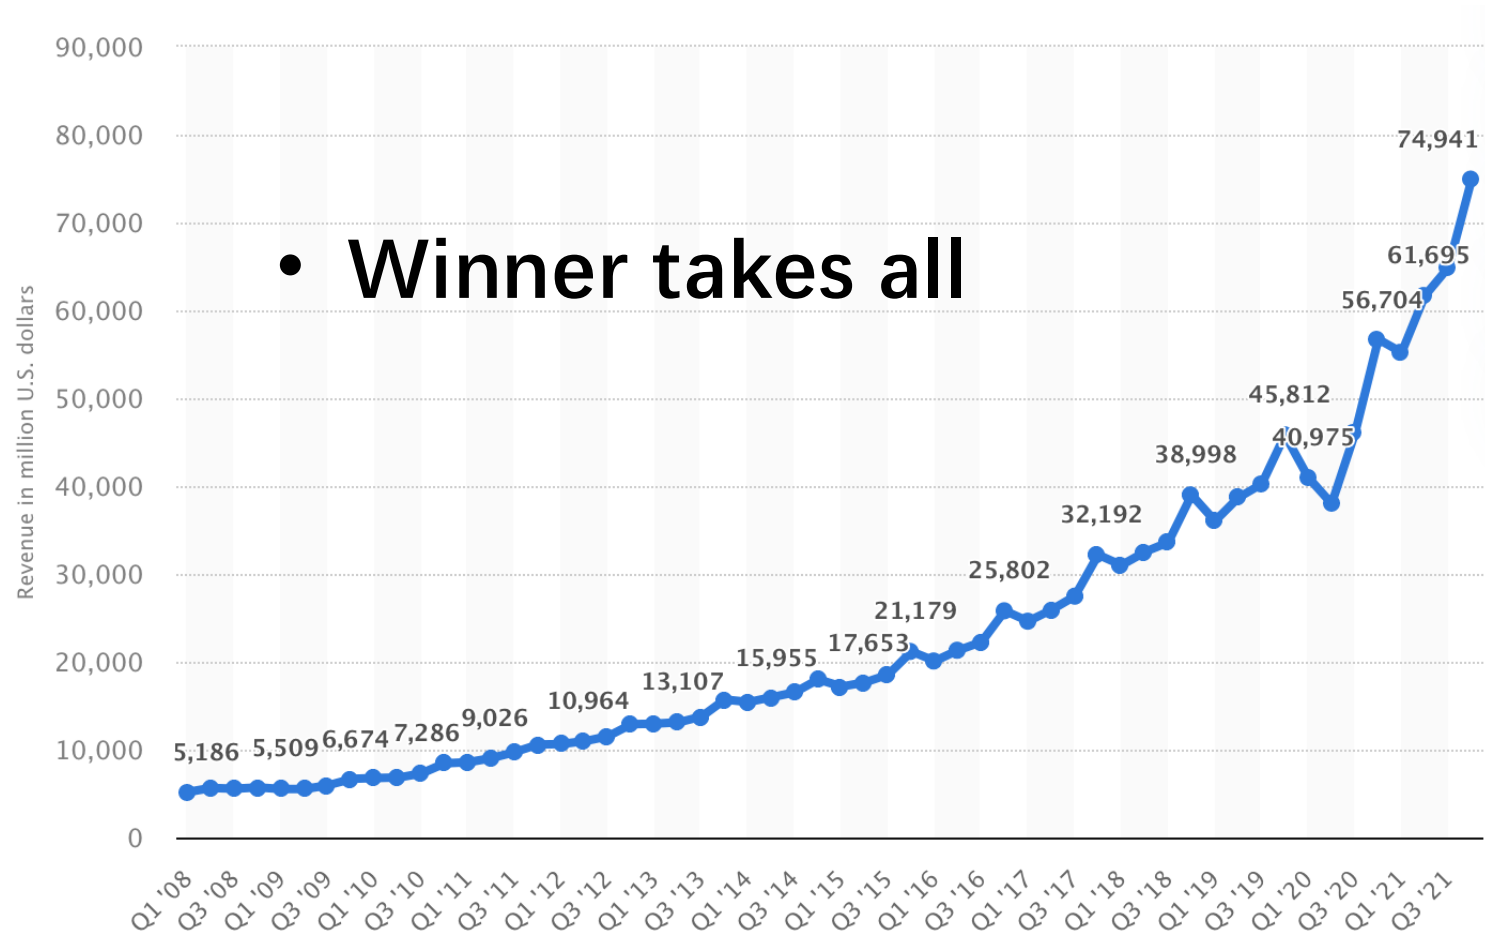

1. Paid inclusions

- Advertising programs where pages are guaranteed to be included in a search engine's index in exchange for payment
- no guaranteed ranking
- payment made on a *Cost Per Click (CPC)* basis
- Advertisers pay to be included in the directory on a CPC basis or per-url fee basis with no guarantee of specific placement

2. Paid placements

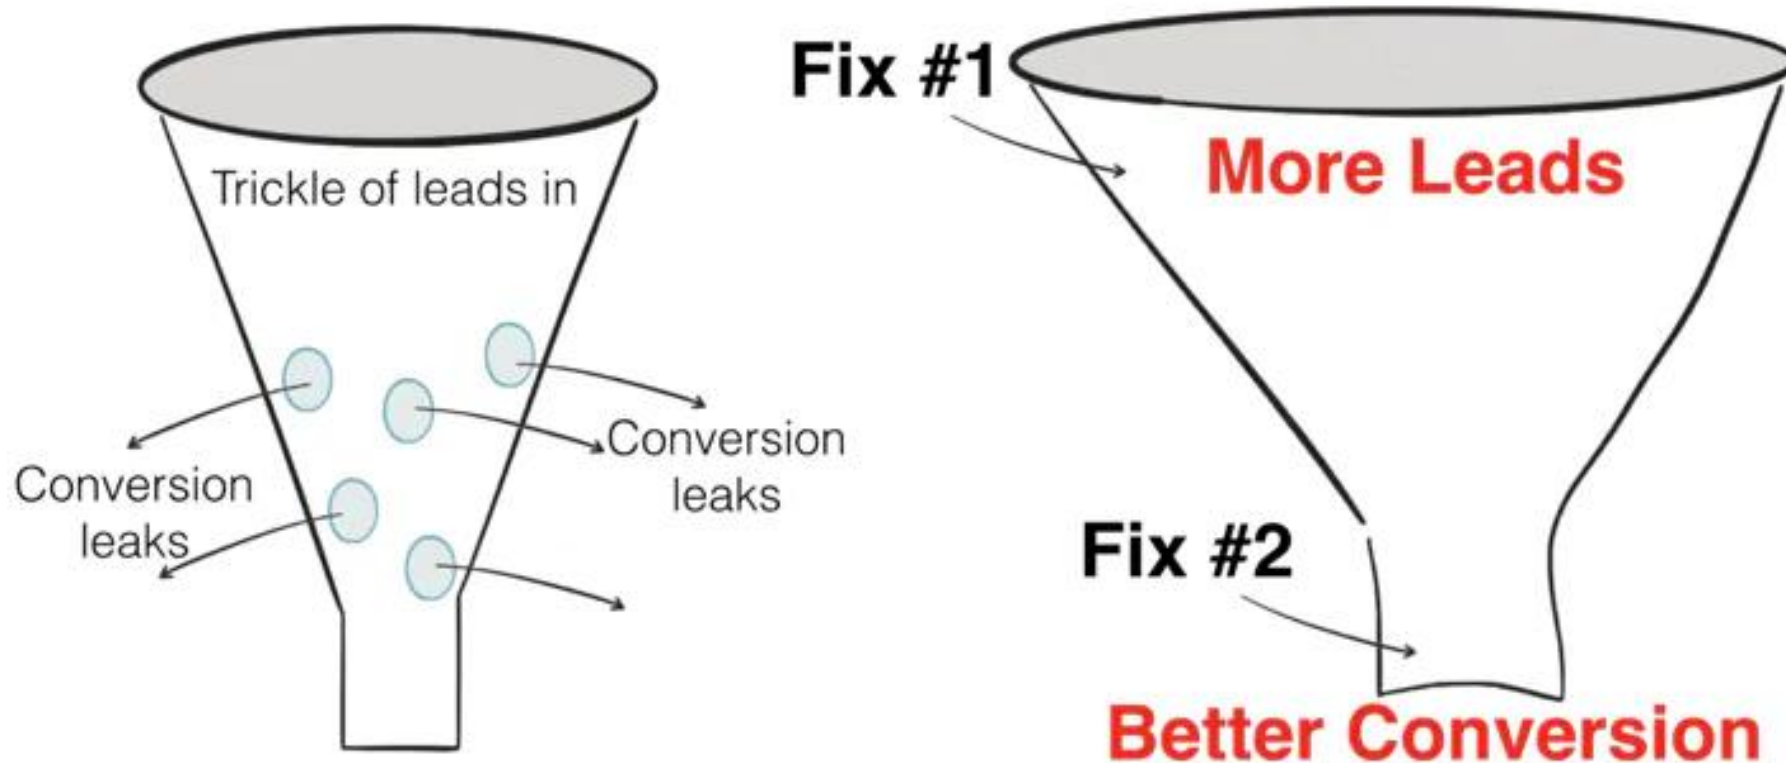

- Advertising programs where listings are guaranteed to appear in organic listings
- the higher the fee, the higher the ranking
- eg *sponsored links* and *Google's Ad words*
- can be purchased from a portal or a search network
- search networks are often set up in an auction environment where keywords and phrases are associated with a cost-per-click (CPC) fee.

Revenue of Google

<https://www.statista.com/statistics/267606/quarterly-revenue-of-google/>

Marketing is not only traffic

- Increasing the number of leads coming into the funnel and
- Increasing the conversion rate of leads-to-buyers.

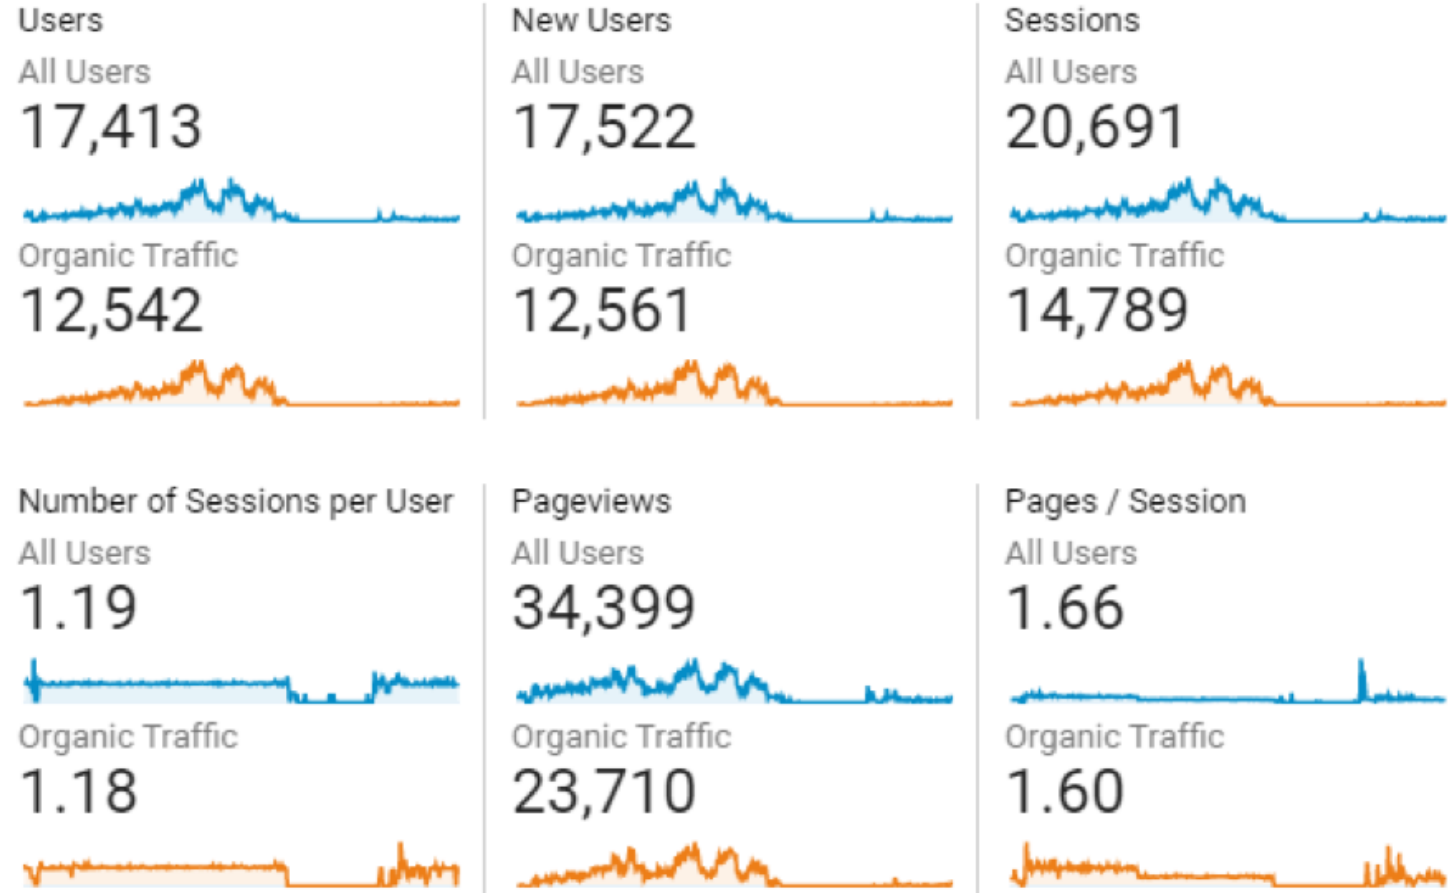

Don't waste the traffic

Engagement for the web traffics and final deals are also very important!

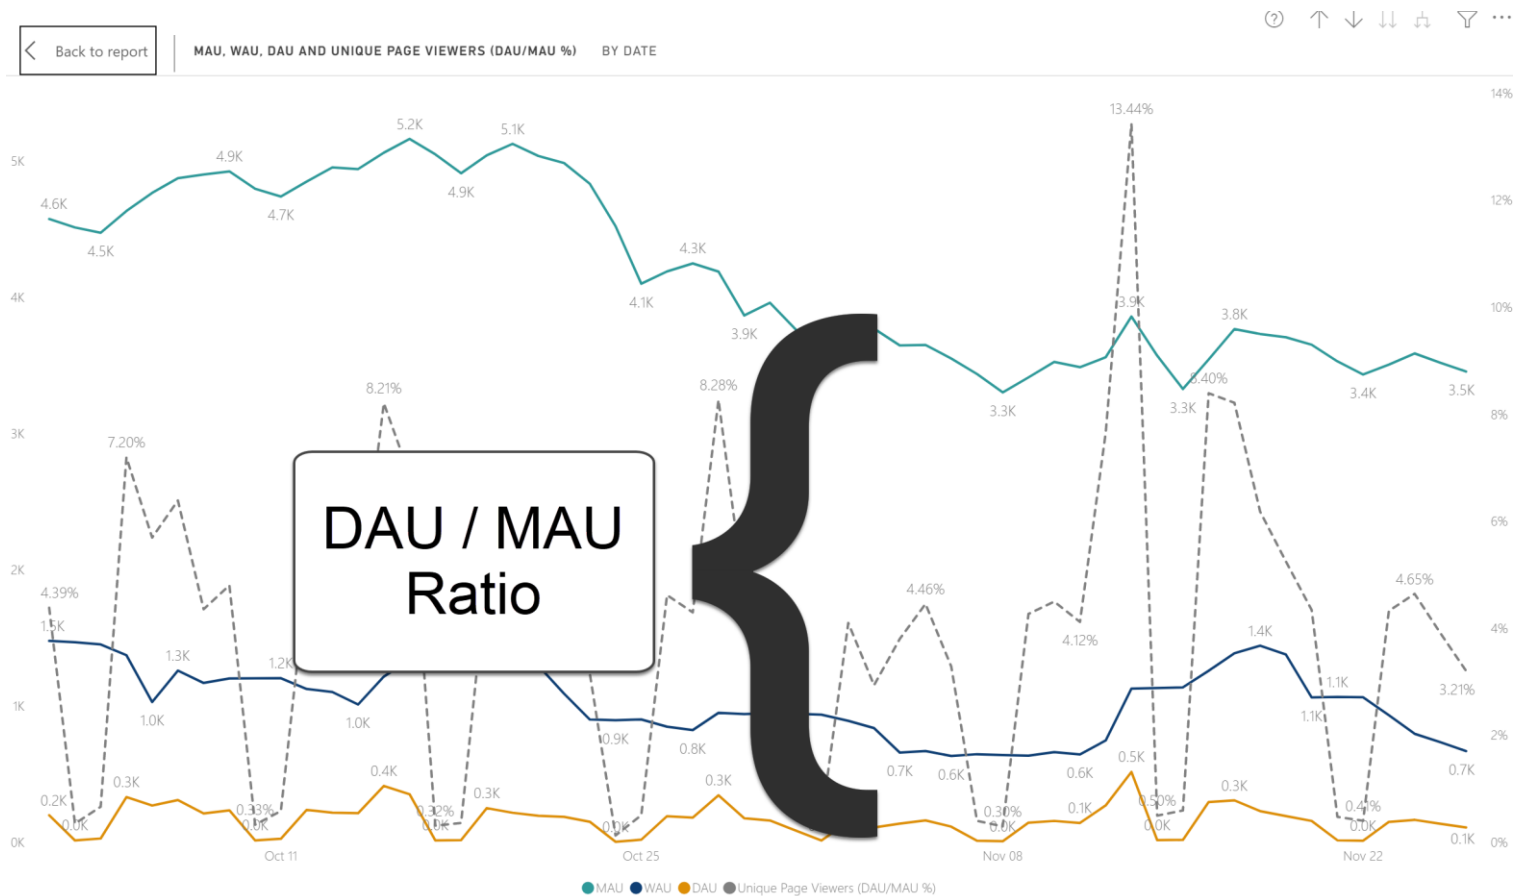

Metric for web traffic

- For pc web
 - User
 - Session
 - PV (page view)
 - UV (unique Pageview)

Metric for web traffic

- For mobile app
 - DAU: *daily active user*
 - WAU: *weekly active user*
 - MAU: *monthly active user*

<https://support.tygraph.com/support/solutions/articles/67000388299-dau-mau-ratio>

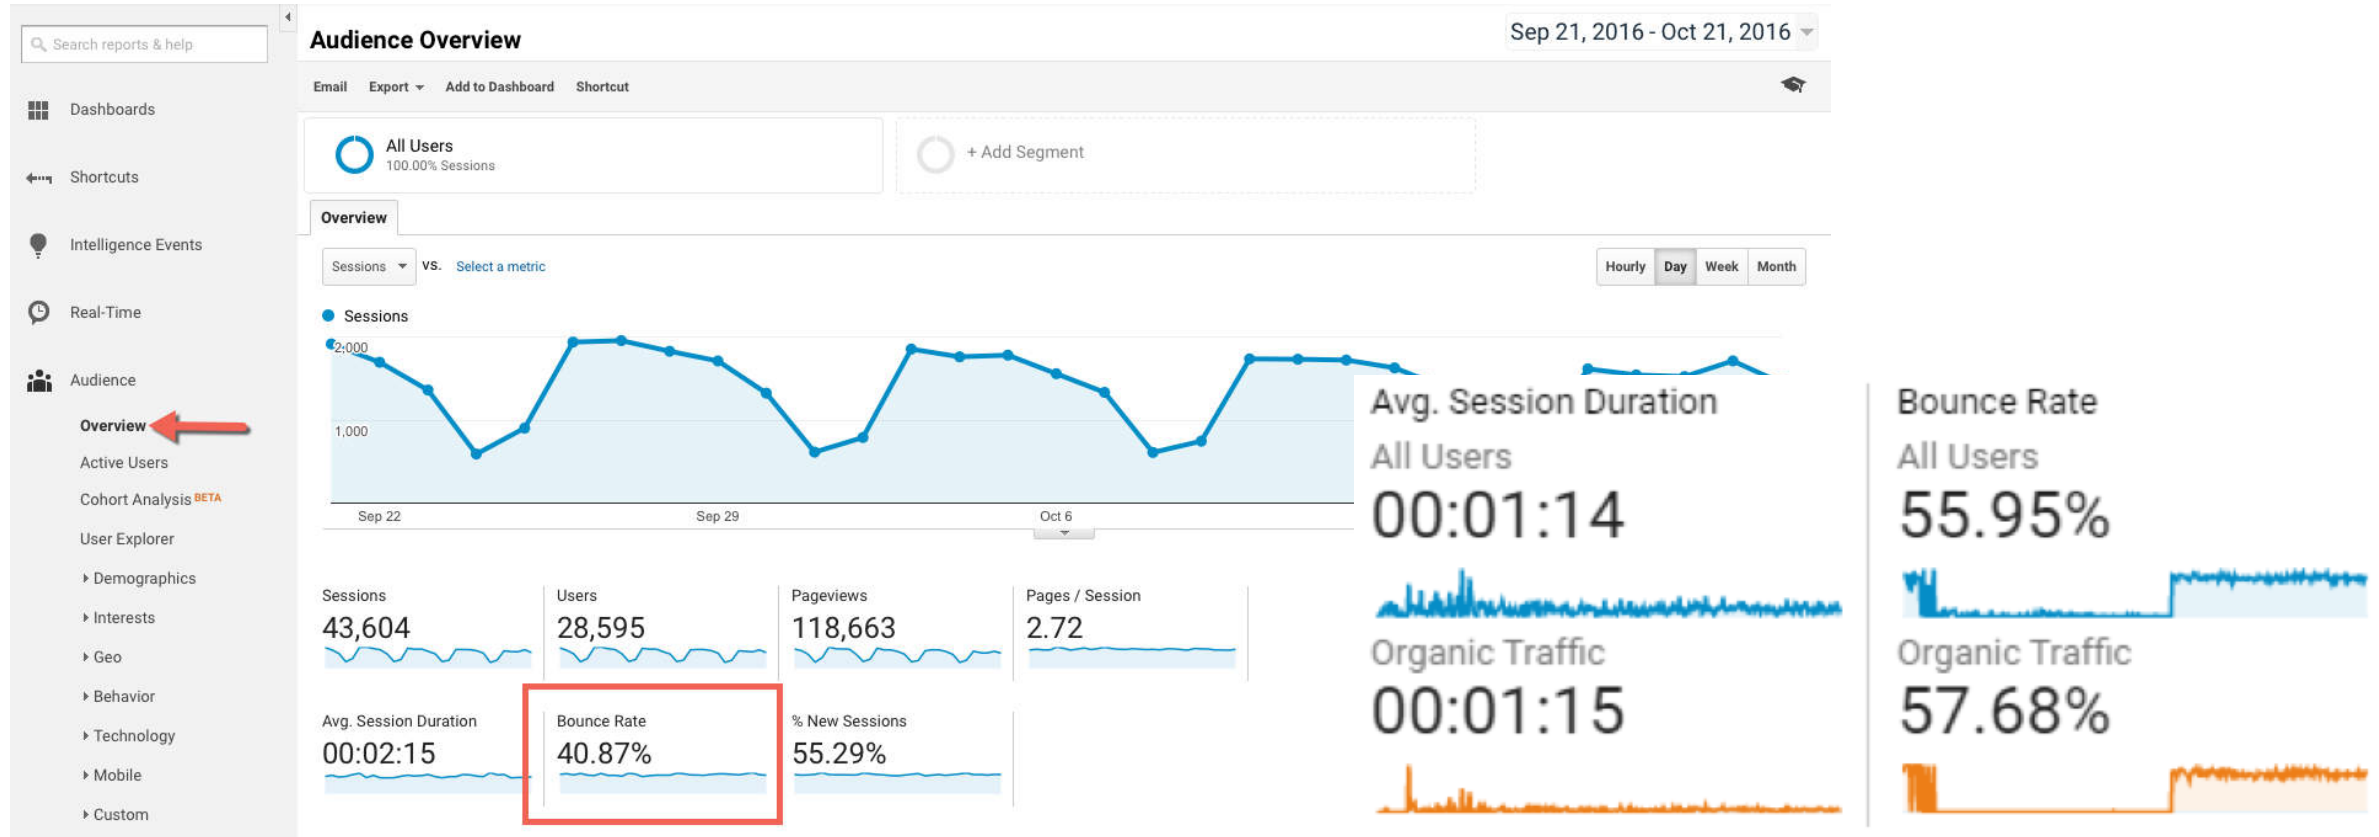

Metric for SEO

- The SEO checker can check your site's SEO score based on different factors.
- To use it, simply plug in your domain and click the button.
- The engine will scan your entire website, give you a score based on your performance and offer you personalized tips on how to improve your website for search traffic.

<https://www.prnewsonline.com/5-metrics-crucial-to-seo-success/>

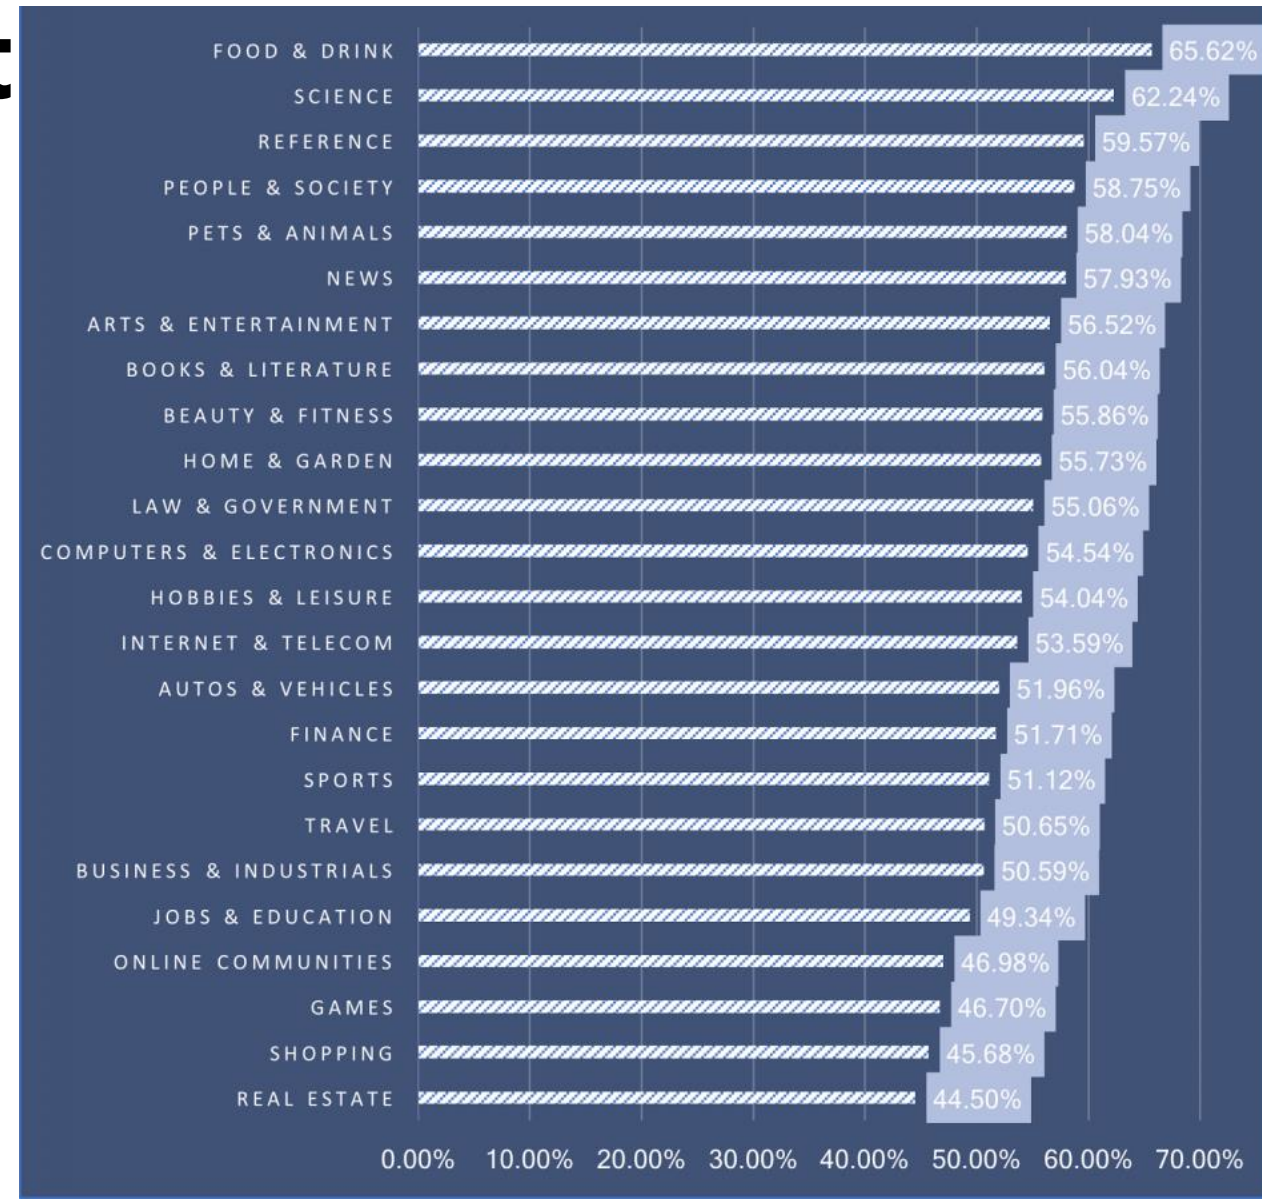

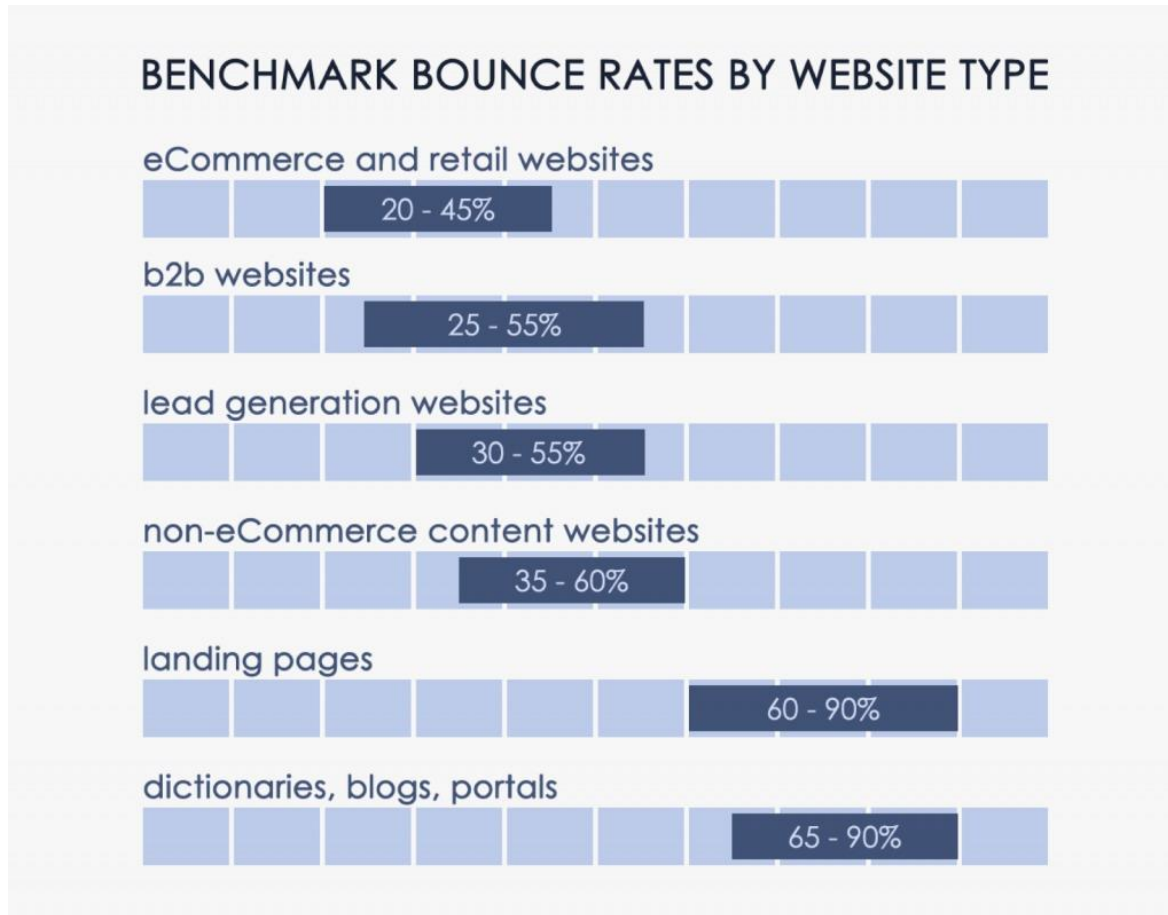

Metric for engagement

Bouncing rate is the percentage of visitors that left the site after viewing only one page.

<https://www.prnewsonline.com/5-metrics-crucial-to-seo-success/>
<http://www.x-cart.com/ecommerce-101.html>

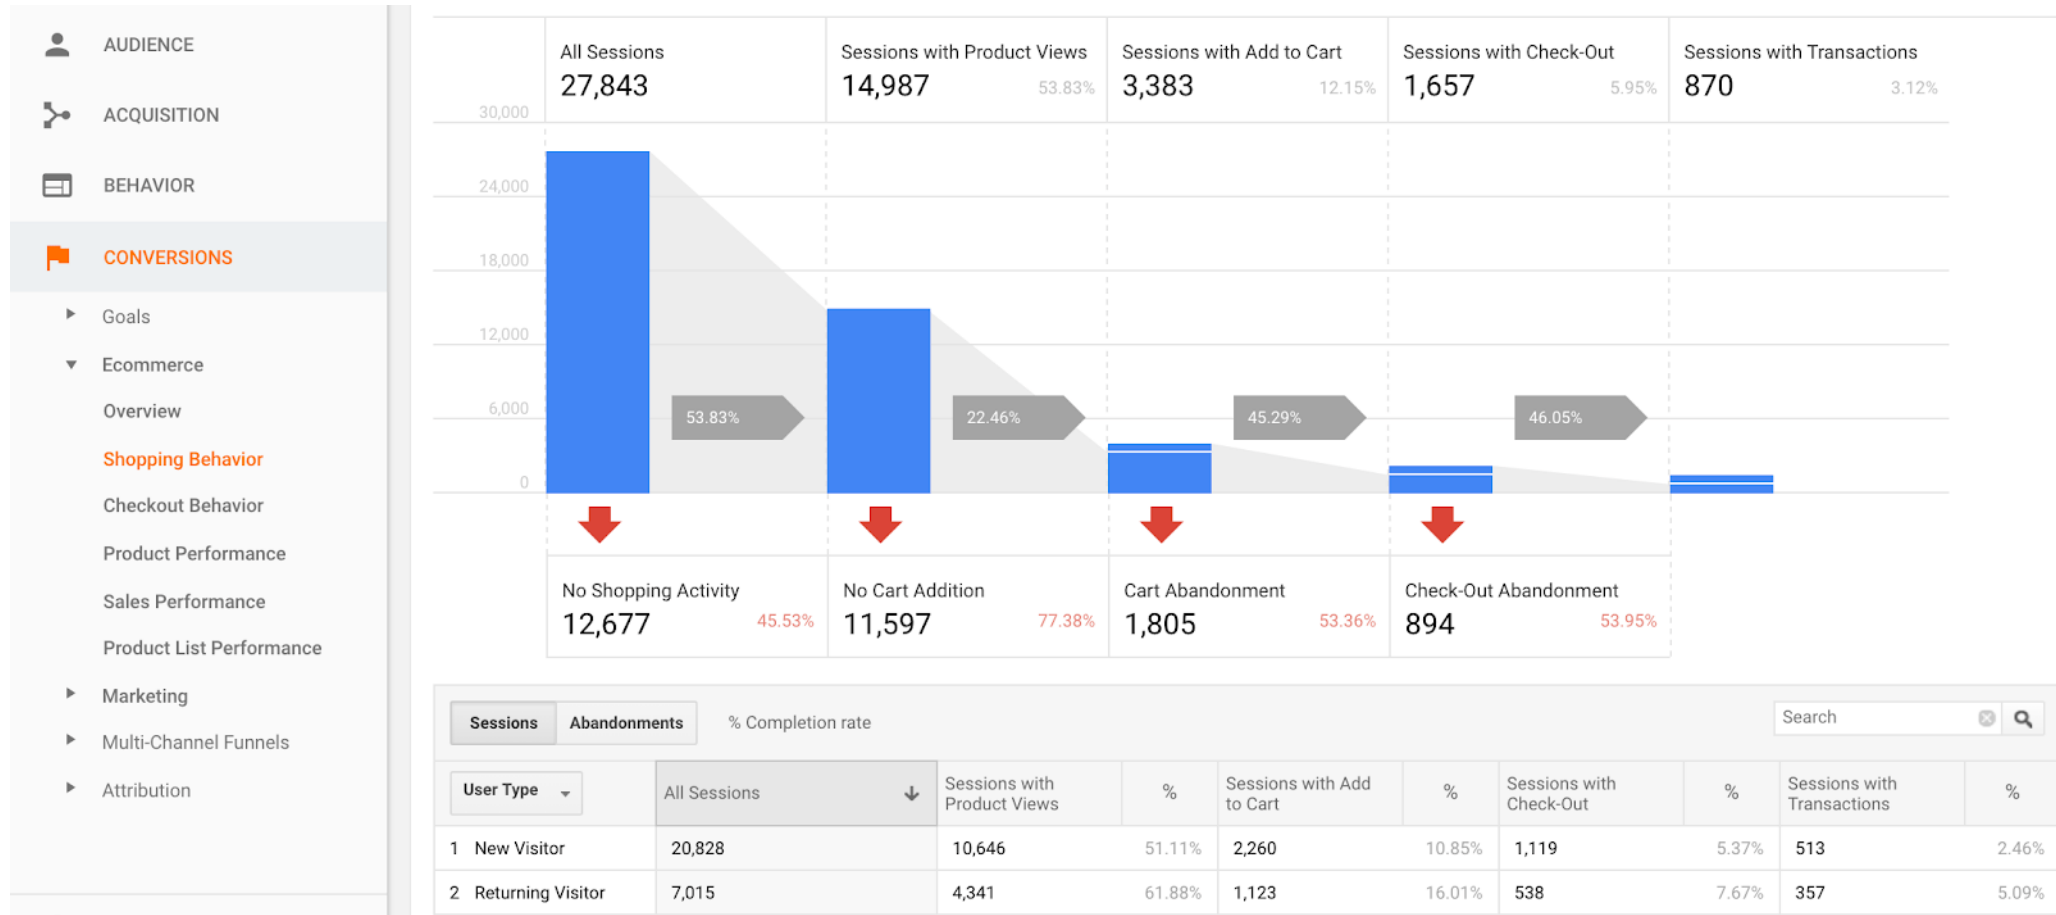

Metric for engagement

You should know the **average** bouncing rate for your segment.

<https://cxl.com/guides/bounce-rate/benchmarks/>

Metric for conversion

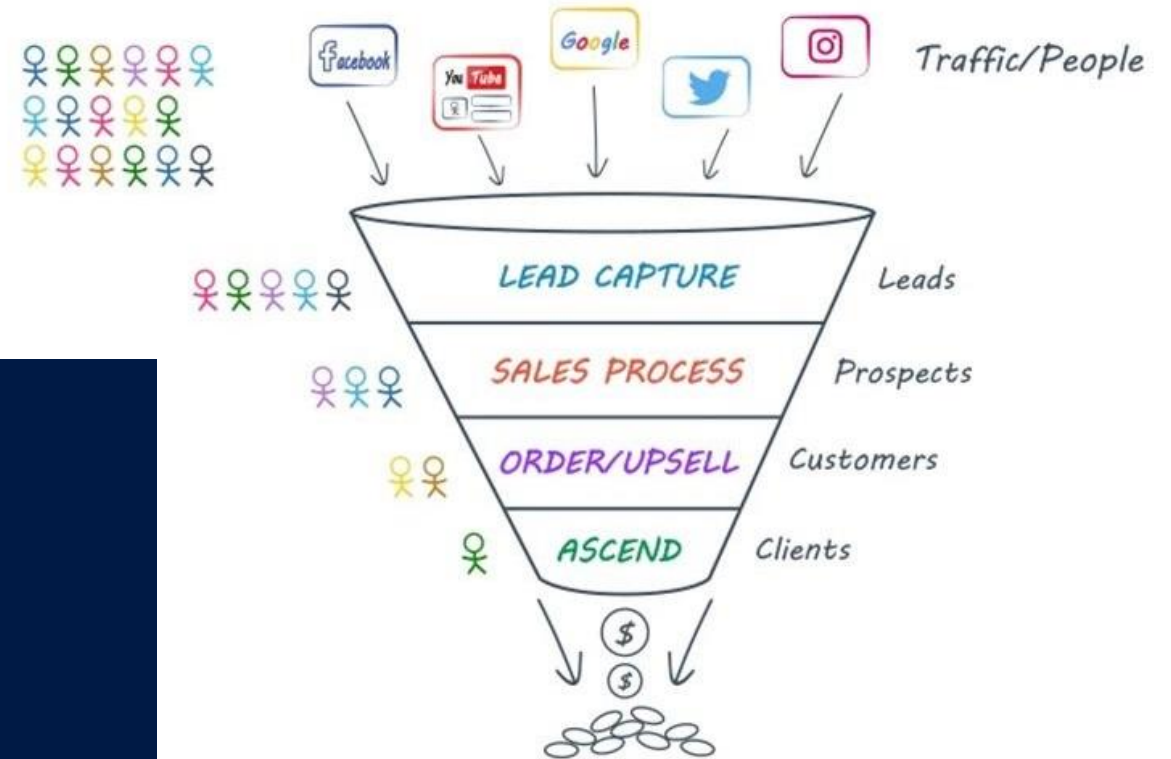

Abandoned carts means you engage your customers, they come, pick goods and... something distracts them or they just change their minds or wait for a coupon – a ton of reasons.

<http://www.x-cart.com/ecommerce-101.html>

Metric for overall

$$\text{ROI} = \frac{\text{Return} - \text{Investment}}{\text{Investment}}$$

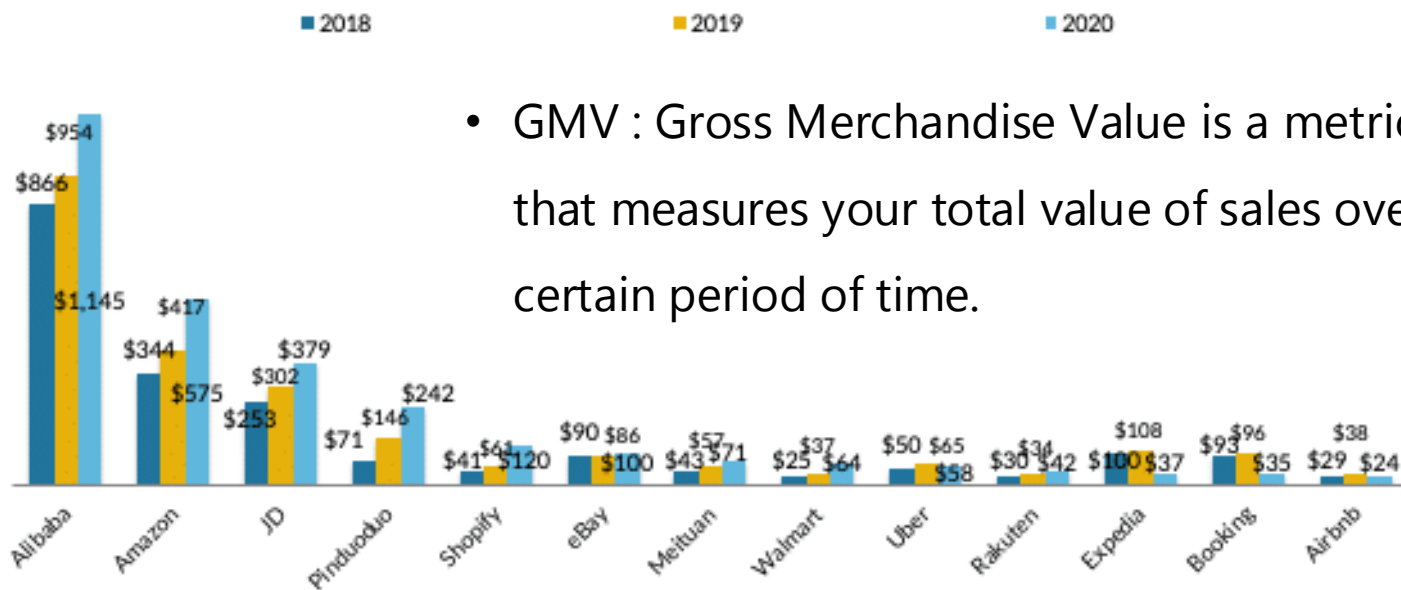

- Put simply, **return-on-investment (ROI)** is the ratio between the money you've made (profits) and the money you've spent (costs).
- There are many different models. You may refer to the post: 7 Popular Marketing ROI Formulas

<https://databox.com/how-to-calculate-your-marketing-roi>

Magic of GMV

CIW

Top B2C e-commerce companies by GMV (USD; billion)

- GMV : Gross Merchandise Value is a metric that measures your total value of sales over a certain period of time.

China Internet Watch

Copyright © 2021

Source: United Nations, China Internet Watch, May 2021

- $GMV = \text{sales} + \text{cancel order} + \text{reject order} + \text{return order}$

【按其他网红带货的GMV统计方法，也是电商行业通行的方法，我三场已卖了近4亿。电商行业都是按下单来算GMV，DY是按实际成交算GMV，这就是为什么我们官方公布的战报数字，总是远低于第三方平台做的统计。以第一场为例，所有的第三方平台报的都是1.7、1.8亿，我们自己报的是1.1亿。下一场开始，我们会按电商行业的通行做法发战报。免得招商时，被不了解电商行业“规矩”的传统厂商客户误解】

分享到

GMV vs Net sales

Net Sales Formula = Gross Sales – Sales Return – Allowances – Discounts

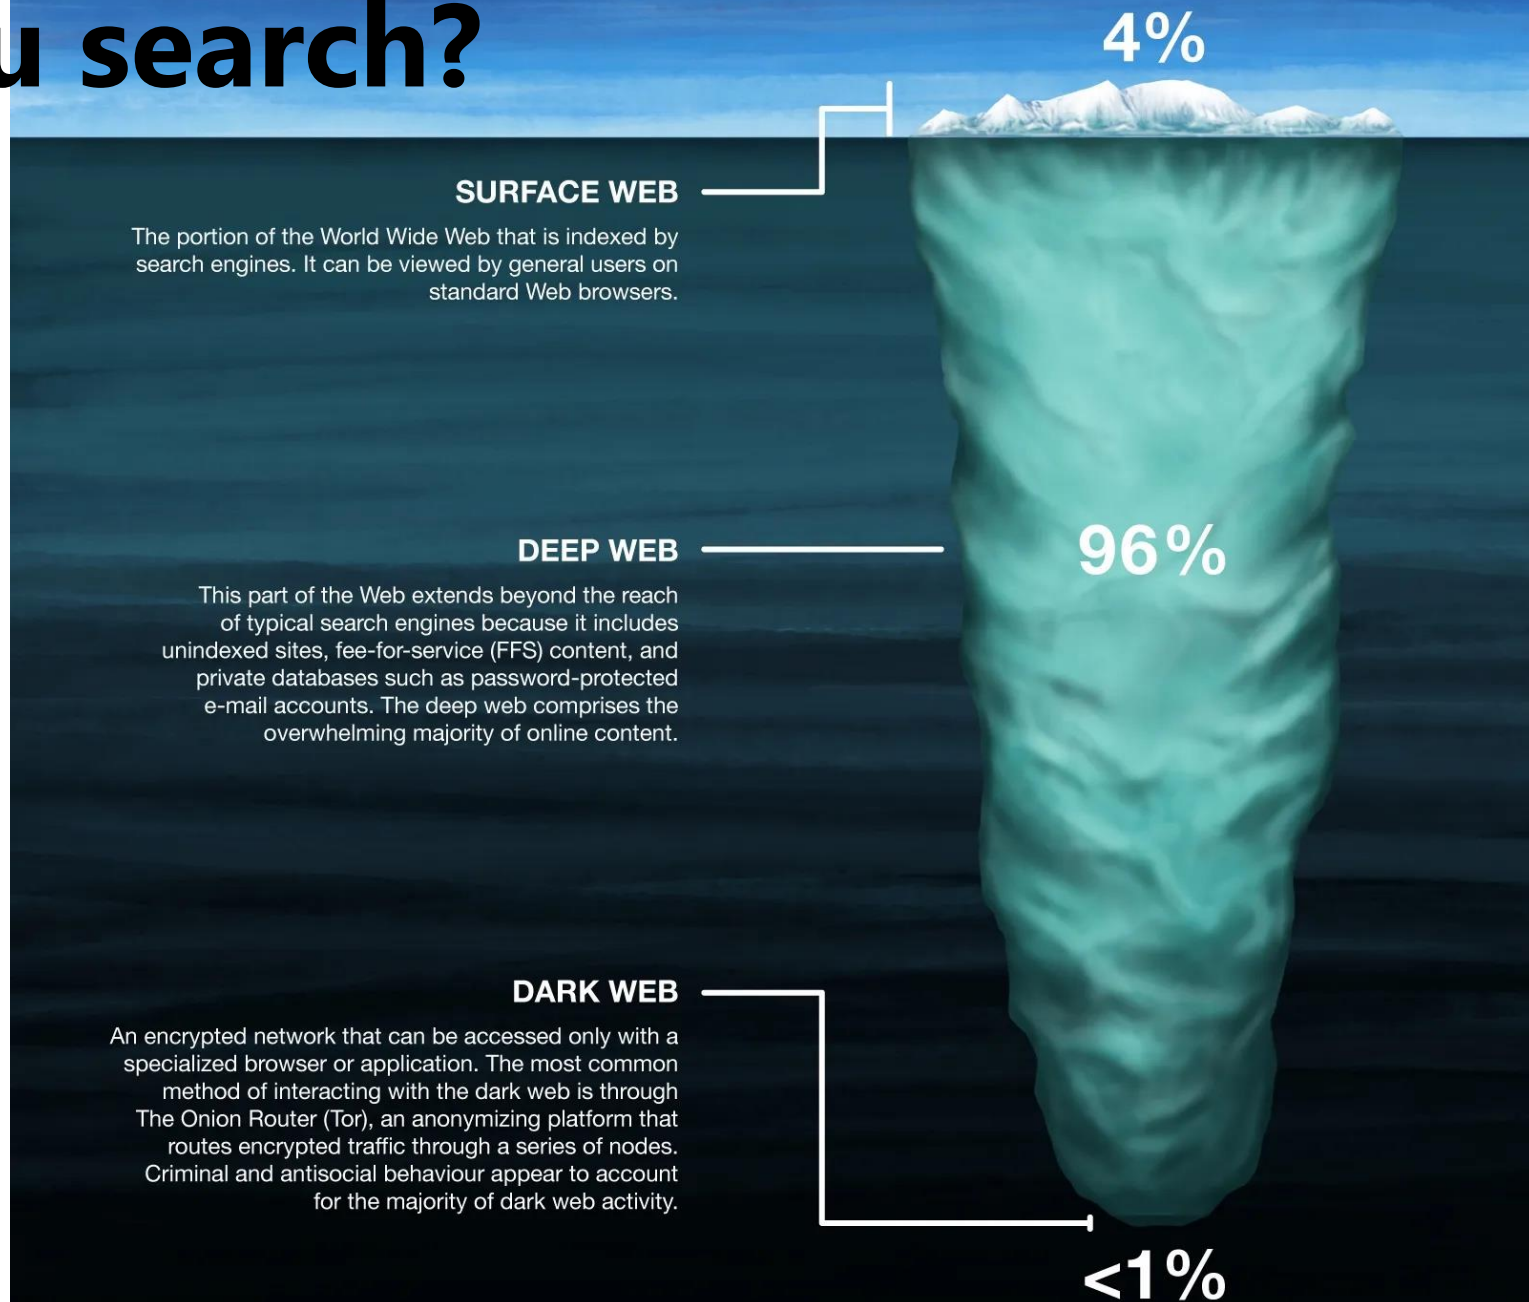

Many terms for different point of view:

- **Customer acquisition cost (CAC)**
- **Customer lifetime value (LTV)**
- **Net merchandise value**
- **Churn rate**
- **Average order value (AOV)**
- **Conversion rate**
- **Profit margin per product**

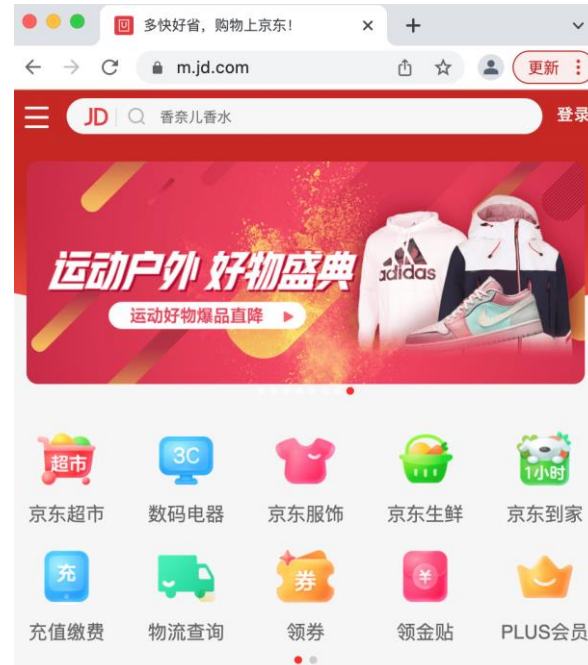

How deep can you search?

- You can simply say NO to web spiders to keep your web not be indexed by search engine.
- Actually, most web resources are not covered by Search Engine.

World Wide Web

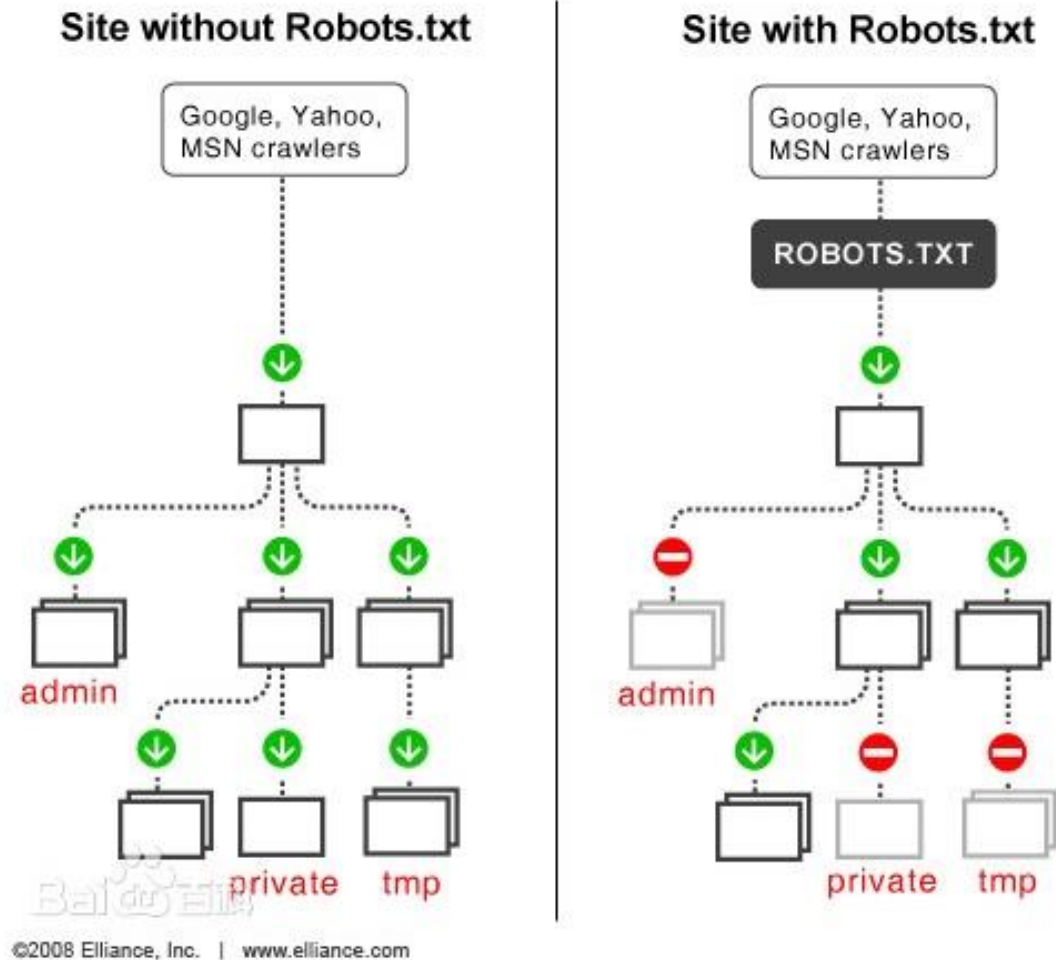

Search engine in **Private** market

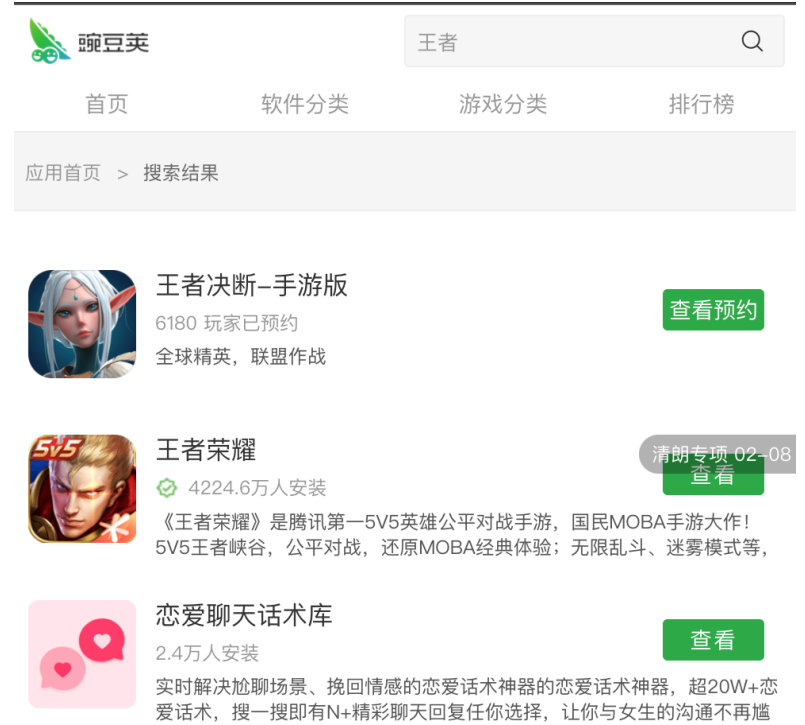

- How to make it private?
- Say **NO** to web robots

Robots.txt

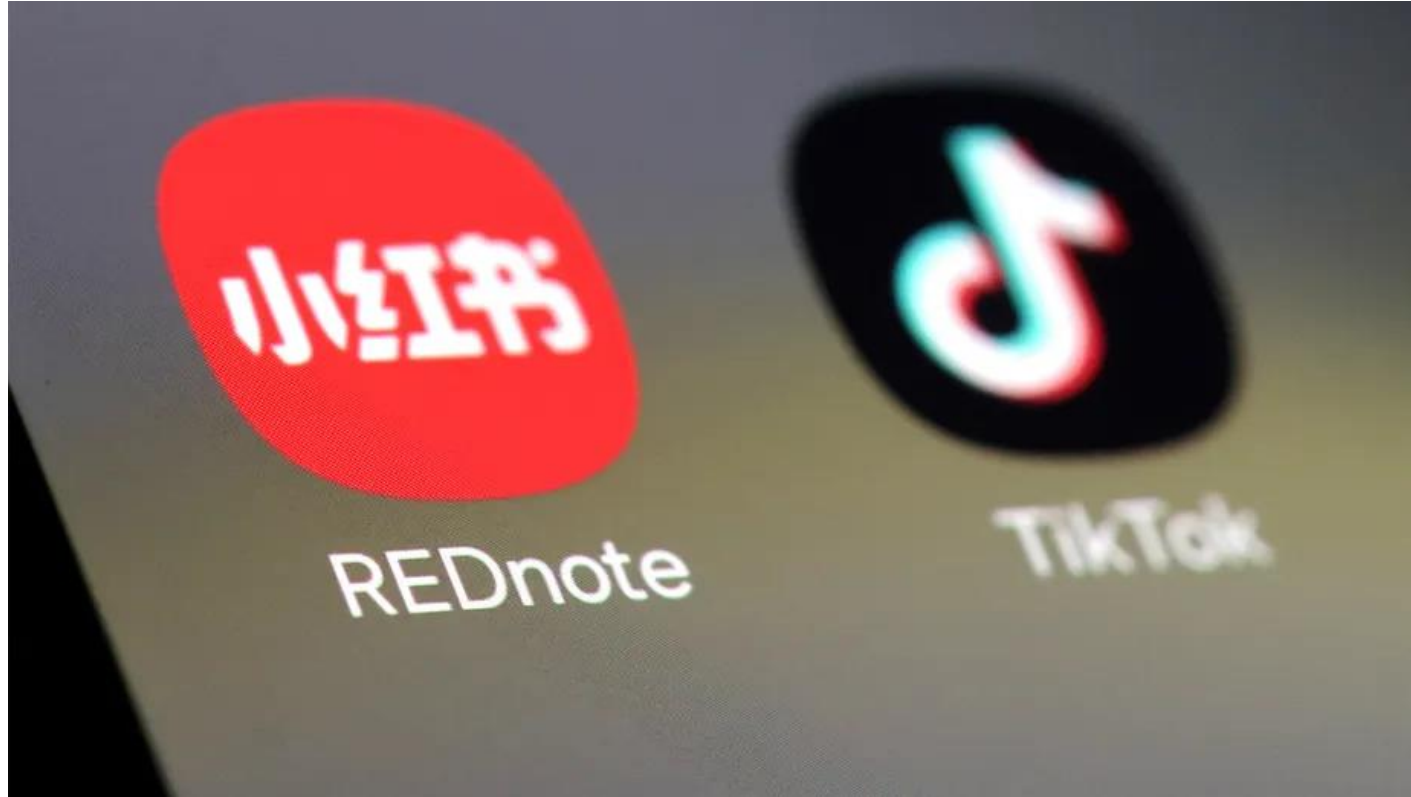

- Use the robots.txt file to restrict search engine crawlers from indexing.
- It is not a technology to against the crawlers but an declaration.
- Ignoring it violates ethical norms and maybe the laws.
- Aggressive scraping can overwhelm servers, causing service degradation.
- Unauthorized commercial scraping may also breach terms of service and intellectual property rights.

Search engine for mobile apps

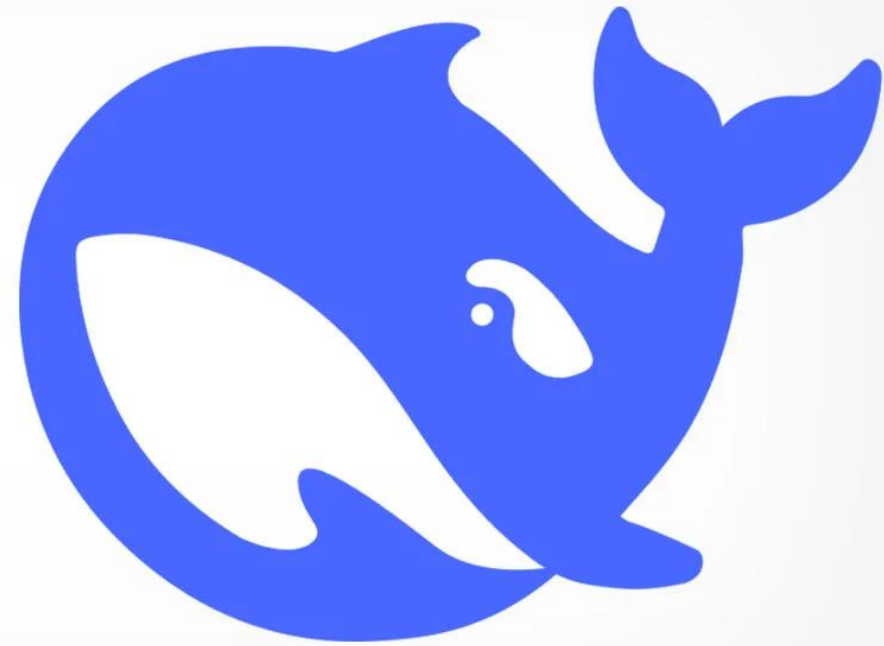

- Ranking, optimization and marketing (pay for ranking)

Short-Form Video marketing

- In recent times, short-form videos have become increasingly vital to marketing strategies.

How about AI age?

- Will AIO (AI optimization) generate?

- Time will give us the answer.
