

BUS303 Final Year Project (FYP)

Presentation

Week3 AY2526

Outlines

- ✓ FYP Assessment in Semester 2
- ✓ FYP presentation schedule
- ✓ FYP presentation structure
- ✓ Tips for different sections of your FYP presentation
- ✓ Marking Criteria
- ✓ Reminders

Assessments

Proposal (15%)

- Initial thinking on research questions and research approaches
- basic understanding on the relevant literature
- Execution plan with project risk and feasibility analysis

Week 7- Week 9

Presentation (45%)

- Summarize FYP progress and report results
- Receive formative feedback and writing up the final dissertation

18 May, 2026

Thesis (40%)

- Complete 10,000-word research thesis
- Passing final thesis is a mandatory requirement to pass the module

FYP presentation schedule

- Time: Week 7 – 9
- Venue: **onsite**
- The presentation slides must be submitted before **9:00 am on April 13, 2026** via LMO, no matter on which date you will present. Late submissions will be subjected to the university's late submission policy.
- **20-min presentation + 10-min Q&A**

FYP presentation schedule

What shall I do if I cannot present on the scheduled date?

Solution: communicate with your supervisor to consult if it is possible to postpone for a few days (but before April 30)?

- A. Yes. Send an email to IBSS.FYP to clarify the new date and the reasons.
- B. No. Send an email to IBSS.FYP for further help.

FYP presentation schedule

Can I present online?

Online presentations will only be considered in **exceptional cases**, students must obtain prior approval by contacting IBSS.FYP@xjtlu.edu.cn before the scheduled presentation date.

FYP presentation schedule

Difficulties: sudden supervisor change

- Please contact your new supervisor if you have not done so.
- If you have any difficulties, please let us know as early as possible so that we could help.

Suggested presentation structure

Section	Time	No. of slides
Introduction/RQs	2-3 minutes	2-3 slides
Literature Review/conceptual framework	3-4 minutes	≤3 slides
Research Method (Data collection included)	5-6 minutes	≤5 slides
Analysis and discussion of results	5-6 minutes	≤5 slides
Conclusion	1-2 minutes	≤2 slides
Overall	20 minutes	
Q&A	10 minutes	

There is no standard way of presenting i.e., it is case specific. Please discuss with your supervisor, as well as join workshops.

Tips for different sections: Introduction

The aim is to show what you are doing in your FYP:

- ✓ Start with the motivation
- ✓ Give a brief background of your research topic
- ✓ Formulate your **research questions** and how can you contribute to this topic
- ✓ Briefly explain how you will address the questions
- ✓ Wrap your work in a way that people will be interested to your further presentation.

Tips for different sections: Literature Review

This is a section to convince people you are working with theoretical/empirical supports not merely based on conjectures:

- ✓ Outline the most important/relevant literatures you reviewed by author and years.
- ✓ Briefly explain their main findings and induce the views on your research questions.
- ✓ Link the above to your own study.
- ✓ Don't put too many details (avoid long sentences/paragraphs).
- You can structure the literature by findings, methods or even history. This depends on how you would like to present this section.

Tips for different sections: Research method

- ✓ Examiners will carefully examine this to make sure you are doing things right.
- ✓ Briefly explain the methods.
- ✓ Clearly introduce variables (if you have).
- ✓ Demonstrate how these methods can address your research questions.
- ✓ Explain what your data are.
- ✓ Explain the data source and how you formulate or construct them (this depends on your data type)
- ✓ Explain how you collected data if you use first-hand data

Don't put all the details but important ones!!!

Tips for different sections: Results

Explain how you apply the research methods aforementioned

- ✓ Demonstrate your key results so far.
- ✓ Explain how the research questions are answered.
- ✓ Showing results is always better than showing your efforts.

Tips for different sections: Conclusion

For a proper presentation, conclusion is necessary:

- ✓ Lastly, give a short conclusion to your presentation.
- ✓ If still have time, provide a prospective plan (very short) about how to wrap up your FYP.

General tips

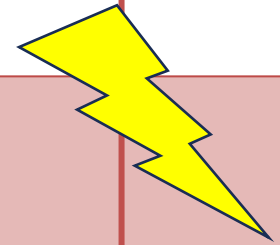

- Keep your presentation simple and clear.
- Keep your no. of slides less than 20 (content).
- Focus on main ideas: research questions, relevant research methods, data and findings.
- Showing what you have done.
- It is nice to start with a story and end with promising progress if it is feasible.
- Result section is a convincing evidence of your work.
- Try to design “professional” and decent slides.
- 20 minutes is too short to put every detail in a presentation.

Marking Criteria: Delivery of Presentation (25%)

Delivery of Presentation (25%)		Marks
Use of visual aids (clarity of slides, appropriate use of figures/tables).		10
Clarity of speech, confidence, and professionalism in delivery.		10
Pace of presentation (time limits are observed).		5

Marking Criteria: Content & Progress (75%)

Content & Progress (75%)	
Clear explanation of research background, motivation and objectives.	10
Critical engagement with relevant literature and conceptual framework.	10
Justification and explanation of methodology.	10
Analysis and discussion of results.	15
Defense of research (ability to answer questions effectively, critical reflection on strengths and limitations).	30

Reminders

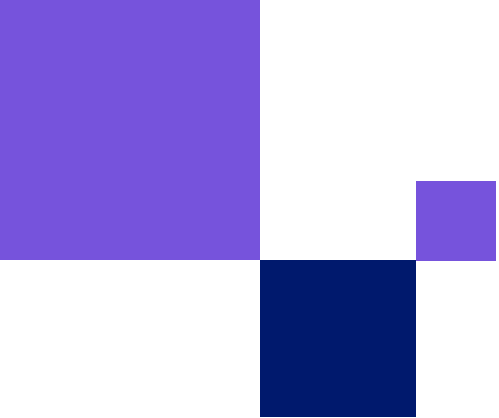

- Backup your presentation slides
Store it in USB devices, not only in email.
Technical issues may occur anytime
- Get ready to the venue in advance, e.g., 10 minutes before the time slot.
- Please be aware of dress code.
 - ✓ look more professional.
- Be confident while presenting
 - ✓ Eye contact is important.
 - ✓ Don't merely read through the slides or scripts.
 - ✓ Watch your pace.

Reminders

- Time management
 - ✓ Get prepared and be clear.
 - ✓ Every picture/figure has its meaning.
 - ✓ Be critical! Don't put too many details.
 - ✓ Avoid too many words in a slide.
- Take notes for comments/feedback.
- **Join Workshops for extra support**

FYP Helpdesk

- Email: IBSS.FYP@xjtlu.edu.cn
 - For FYP questions in general (administration issues, submission issues, not your research topic).
- FYP coordinator/BUS303 module leader: Dr. Yidong Tao
 - Office: BS208
 - Office hours: Tuesday 15:00-17:00
 - Email appointment is needed.
 - Yidong.Tao@xjtlu.edu.cn
 - For sensitive issues.
- Your supervisor
 - For anything related to your FYP research.

THANK YOU
